## Daniel 12:4

**But you Daniel, seal, close and keep the words secret and seal, close and shut up the scroll until the time of the end; many will run back and forth, become apostate, turn aside or fall away and entangle oneself and knowledge on moral qualities, understanding and wisdom will increase and made numerous.**

**Amos 8:11**

**“Behold and look, the days are coming”, declares my Eternal Yahuah, “When I will send a famine, starvation and hunger in the land, not a famine, starvation and hunger for bread and not a thirst for water, but of hearing, understanding and receiving and taking action of the Words and Communication of Yahuah.”**

The adversary through his minions works very hard to strip away Yahuah's words. We are seeing that in the way the world has become.

It's now worse than Sodom ever was and with increasing technology and the end goal to merge humankind with machine as an enticement for immortality, Yahuah's words are beginning to take a poor second to becoming righteous and finding true immortality!

The adversary is coming for Yahuah's Words and we cannot let that happen by being **SILENT!**

A DEW is a system using a beam of concentrated electromagnetic energy (including but not limited to lasers and high power microwave systems), or atomic or subatomic particles primarily as a direct means to kill, injure, disable, or temporarily incapacitate people or destroy, damage or temporarily incapacitate property or materiel. Acoustic weapons use sound across the entire frequency spectrum to kill, injure, disable, or temporarily incapacitate people. Acoustic weapons, although outside the Joint definition of DEW, have effects and hazards more similar to DEW than to conventional weapons.

# Santa Rosa, California

What type of 'forest fires' leave trees intact, but vaporize homes without a trace? Appliances, granite countertops, toilets, textiles, stonework etc completely vanished?

Firefighters reported "it's like we've been nuked", never seen anything like it. On the other hand, military intelligence agencies recently announced publicly that they've been testing directed energy weapons (DEW's) mounted to aircraft.....

In October 2017

**What caused the trees to remain standing tall and green, while the Kmart store, in Santa Rosa, burned on an island to the ground? Only a microwave could cause this damage.**

<https://www.aircrap.org/2017/10/13/california-fires-dew-directed-energy-weapons/>

Directed Energy Weapons  
– Even the head of Cal Fire for the state said on CNN he had no idea what started the over 60 strikes that came out of nowhere in the middle of the night without warning. Sudden, unexplainable winds kicked up to 60-70 mph, **blue flashes and sparks** were seen above by many, including me. **Cars were torched, yet trees untouched.**

01/12/2019

DOUGLAS THRON  
AERIAL  
CINEMATOGRAPHER

I noticed a few of the pictures and read a few witness testimonies about what they encountered and I think there are a lot of questions that need to be answered. The fire started on October 9th and from what I read, it happened in this neighborhood really fast. People were claiming they literally had minutes to get out of their houses while some were asleep and died in the fire. Its a sad thing.

Some people believe in regards to this “fire” that it was caused by Direct Energy Weapons called DEW for short. When I first looked at this fire that was my first thought. I’m obviously no expert but based on the way it happened and the aftermath, something isn’t adding up. 91 miles away (there is another 91 for you and a interesting connection to Route 91) is what is called Lawrence Laboratories in Livermore, California. Now I’m familiar with Livermore because this is where I was born. Also notice it is a few miles away from a Shiva Temple of destruction.

A large satellite or space station is shown in orbit above Earth. The satellite is a complex structure with various panels and a prominent green laser beam pointing downwards towards the planet's surface. The Earth's surface is visible below, showing clouds and landmasses.

So they claim that they can harness the energy of 192 lasers into one beam to destroy a big area of land if need be. This is according to the Lawrence Livermore lab. Could it be plausible that something like this happened on October 9?

This comes from the Lawrence Lab's website. "The National Ignition Facility is the largest and most energetic laser facility ever built. NIF is the size of a sports stadium—three football fields could fit inside.

NIF is also the most precise and reproducible laser as well as the world's largest optical instrument. **The giant laser has nearly 40,000 optics that precisely guide, reflect, amplify, and focus 192 laser beams onto a fusion target about the size of a pencil eraser.** NIF became operational in March 2009. By focusing NIF's laser beams onto a variety of targets, scientists create extreme states of matter, including temperatures of more than 100 million degrees Celsius (180 million degrees Fahrenheit) and pressures that exceed 100 billion times Earth's atmosphere.

## Speed-of-light Protection

Science reality has caught up with science fiction. Lockheed Martin is showing that laser weapon systems can turn up the heat and stop land, air or sea targets in their path. And, they can be compact enough and power efficient enough for tactical platforms on the move, providing nearly unlimited "bullets" with speed-of-light response.

## HARNESSING THE POWER OF LASERS

Lockheed Martin is moving at light speed to position these capable systems for success on the battlefield. We have developed innovative fiber lasers, sophisticated beam control and auxiliary technologies. Combined with expert platform integration, these advances enable offensive and defensive capabilities against a growing range of threats to military forces and infrastructure.

01/12/2019

Here is an article about Lockheed Martin's laser weaponry from Defensenews.com that came out in 2016. These lasers are all connected. Now remember that the alleged "Steven Craig Paddock" (The Las Vegas shooter) worked for Lockheed Martin as an auditor.

**MANY MANY people saw electrical flashes that made no thunder in perfectly clear blue sky, and worse, some people even saw small sparks everywhere in the air around them.**

**MOST DAMNING:** People are reporting that their electronics malfunctioned before the fires hit, with the most pronounced and spoken about malfunction being at a hotel, where ALL of the electrical systems in the hotel malfunctioned, including the electronic access doors, forcing people to jump from windows (because they could not leave their rooms) to escape an approaching fire that instantly appeared out of nowhere in perfect weather.

These houses untouched.

These houses were incinerated to the ground.  
This is NOT a normal housefire!

It is very important to make note of the malfunctioning doors, because a simple power outage will not stop those from working. Something jammed the circuits in the doors. Simultaneously the hotel lost main power, generator backup, UPS backup, and local battery backup. Not even the always operational emergency hall lights worked. That would be totally consistent with a massively potent EM weapon causing complete electronic malfunction because not even the circuits in the emergency backup lighting that turn it on (which operate independent of everything off of a small battery right in the light itself), not even circuits at that small level worked."

17

A large tree trunk is shown with several vertical, glowing orange and yellow openings. The openings appear to be burning from the inside out, with bright light and heat emanating from them. The tree bark is dark and textured. The background shows other trees and a bright sky.

And the interesting thing about lasers is that they are nothing more than man made lightning. Notice the tree and how it is burning from the inside out. I have seen this phenomenon before and it is usually caused from a lightning strike. So was this man made “lightning” in the form of a laser beam?

So the question I have now since we are seeing that this fire may have been caused by some sort of laser technology, is this. What was the Apollo IV rocket launch of September 23rd carrying when it took a “trumpet” satellite into the atmosphere? Is this connected to this laser somehow. It was launched on the “birth of Jupiter”. I can only speculate but the name Apollo keeps coming up. We saw the connection to the owners of the Mandalay Bay being connected to the Apollo management group and now the at the Lawrence facility. They may not mean anything to anyone else but they do to me.

Something else to think about is the reason why these cars are flipped over that were in the fire. Is this from dinner vehicles flipping over from gas explosions or is this from a point of contact from some sort of laser? If it was from gas tank explosions then the cars would have actually been in a few pieces not just flipped over still in contact. Also notice a few of these pictures have cars next to each other that are flipped upside down.

**What flipped the  
car? Notice the same  
thing happened near  
the WTC from DEWS.

01/12/2019 This one in California in 2017. No fire path led to the building. It's as if the building was attacked from above.  
This is a screen capture from the video, "**California Wildfires: More than Meets the Eye**"

From the video, "IT'S OUR OWN PEOPLE....." The burnt line is so straight, it looks like a laser went across it.

01/12/2019

23

This one in California 2017. Notice again how not only is the street clean (showing no signs of it having been windy), but there is also no charring of the street that lies between the pulverized houses on either side. Also the trees on the street between the houses are still green. I just rewatched all the videos and cannot find which one this picture comes from. If anyone does, please contact me to let me know which one.

Santa Rosa. Now we have Santa Clarita. This recent fire is called the Thomas fire because the fire started at St. Thomas Aquinas Roman Catholic Jesuit School. Thomas means twin. We now have California twins Northern California and Southern California being set ablaze. These two separate fires seem to have the same month and some areas being touched and some aren't (green trees and vegetation) all the while everything is turning to dust and ash.

**No. Cal. Witness Account of Suspicious Firestorm Activity by Former Volunteer Firefighter**

## **HOW DO GLASS WINDOWS AND PORCELAIN BATHTUBS GET INCINERATED IN A WILDFIRE?**

**Here's a heads up from northern California. Having lived here for 40 years, I have first hand knowledge and experience of these waves of massive fires over the last 3 or 4 years having experienced 2 here in my own neighborhood (Nevada county) last year in October 2017. I also have firsthand experience fighting a wild-fire in southern California in the late 1960's as a volunteer in north Orange county and east LA county. Cured me of wanting to be a firefighter!**

## Beale Air Force Base Marysville, CA

**This is a TU-2S plane – which is a variant of the U-2  
Dragon Lady**

It appears that over the last 3 or 4 years these massive fires may have been started by “directed energy weapons” either from a drone flown out of a base north of Las Vegas or Beale AFB where they also have drones stationed? Or from a rogue satellite? I have observed these drones flying around here in Grass Valley, completely “dark” no running lights for extended periods of time mostly at night. They have a very distinct sound when they are overhead at low altitudes doing night-time recon?

<http://www.thedrive.com/the-war-zone/11755/u-s-air-force-global-hawk-drone-crashes-in-california>

June 21, 2017

Though there are few details at present, a U.S. Air Force RQ-4 Global Hawk drone has crashed into the Inyo National Forest in California. The accident appears to have touched off a forest fire in the process and local and federal authorities are reportedly already on the scene

Beale Air Force base is home to the 9th Reconnaissance Wing, which operates both RQ-4s and manned U-2 spy planes. It also hosts the U.S. Air Force Reserve's 13th Reconnaissance Squadron, a unit that flies *Global Hawks* that is technically part of the U.S. Air Force Reserve's 926th Wing at *Nellis Air Force Base* in Nevada. There is no indication yet what unit was controlling the drone at the time of the crash.

**PG&E has recently implemented a program here in the north state (which just so happens to be the most conservative area of California) where in “wind events” like this forecasted again tonight, they shut down the grid as a “precaution” to allegedly mitigate wind damage and fire from falling trees, limbs etc. on power lines? You wanna buy a bridge...in Brooklyn?**

My theory is this: the drones or satellites with these weapon systems can target electronic digital signatures on the ground in the form of . . . wait for it . . . “SMART METERS” which give off a radio / WIFI field signature even in the dark!

So when the grid goes down these embedded transceivers go dark and cannot be targeted? You have to ask the question: Is PG&E on to this silent warfare scenario and just trying to cover their corporate asses?

**How else do these brick and stone structures with tile or metal roofs burn to the ground in the middle of parking lots with no flammable forest around? HmMMMM???**

**We are being targeted for destruction by whoever is controlling these weapon platforms and they're targeting the most conservative parts of California and the good hardworking people who live here! Entire towns have been completely destroyed, ie. Santa Rosa, Middletown, parts of Redding and now Paradise?**

**How does a huge logging truck burn to the ground on I-5 near Lake Head, actually melt down and yet the logs did not burn up? Logs = wood = sources of fire and heat in a “campfire” or wood stove? Not even charred? A little common sense and observation tell me there is something very wrong with that picture?**

*These studies are NOT meant to SCARE, but to be aware.  
With Yahuah, we will never be afraid IF we TRUST in him,  
Like Daud/David:*

**Psalm 91:2**

**I will say of YAHUAH, He is my refuge  
and my fortress: my ETERNAL; in HIM  
will I TRUST.**
