These particles are spherical with a textured, bumpy surface and several prominent, spike-like protrusions extending from their outer edges. The particles vary in size and are scattered across the entire frame, creating a sense of a viral outbreak or a digital plague.

A recent investigation conducted by the Columbia Journalism Review (CJR) reveals a number of disturbing findings which point to a multibillion dollar network of information control and narrative management – with Bill Gates squarely at the center. “Gates’s generosity appears to have helped foster an increasingly friendly media environment for the world’s most visible charity.” Up to June of 2020, Bill Gates has ploughed no less than \$250 million in foundation grants into mainstream journalism.

9/05/2020

**Have you ever** watched dumbfounded Bill Gates being interviewed on some program, and the person asking him questions will often refer to Gates as either a “virology expert’, ‘health expert’, or ‘epidemiologist’?

Bill Gates is *none* of those things, and never will be, he has had no training at any medical or scientific school of any kind. So why does the media fawningly refer to him in that way?

**In short,** Gates has long used his foundation's charitable veneer to steer and shape the public discourse on global health. In the case of COVID and vaccines, it is believed that Gates is using his billions to parlay both access and favorable news coverage.

Recipients included news operations like the BBC, NBC, Al Jazeera, *ProPublica*, *National Journal*, *The Guardian*, Univision, *Medium*, the *Financial Times*, *The Atlantic*, the Texas Tribune, Gannett, *Washington Monthly*, *Le Monde*, and the Center for Investigative Reporting; charitable organizations affiliated with news outlets, like BBC Media Action and the *New York Times*' Neediest Cases Fund; media companies such as Participant, whose documentary *Waiting for "Superman"* **supports Gates's agenda on charter schools.**

Journalistic organizations such as the Pulitzer Center on Crisis Reporting, the National Press Foundation, and the International Center for Journalists; and a variety of other groups creating news content or working on journalism, such as the Leo Burnett Company, an ad agency that Gates commissioned to create a “news site” to promote the success of aid groups.

A glowing cylindrical lantern with a black metal cage hangs in the center of the frame. The background is dark and industrial, with blue structural beams and a white wall on the left. The lighting is dramatic, with the lantern being the primary light source.

In some cases, recipients say they distributed part of the funding as sub-grants to other journalistic organizations—which makes it difficult to see the full picture of Gates’s funding into the fourth estate.

## ACTIONS TOWARDS VACCINATION FOR ALL

When one considers how intimately involved the Bill and Melinda Gates Foundation is with multiple global stakeholders in the much-hyped impending roll-out COVID vaccines – namely, through GAVI, and partnering with transnational pharmaceutical giants like AstraZeneca, Sanofi, Pfizer, Merck, J&J, Eli Lilly, Novartis, and others.

This is in addition to Gates funding of key 'global health' policy players like the Wellcome Trust, and the World Health Organization, as well as various government agencies – the likelihood of conflicts of interest is enormous.

Not least of all is the fact that many of these same pharmaceutical firms are also the top advertising buyers on all of the major mainstream media outlets globally.

**It's also been** revealed how Gates is funding the supposed 'fact checkers' currently being used by Facebook and other social media firms – which are aggressively censoring any information on their platforms which is critical of Gates and pharmaceutical firms, particularly in relation to COVID and vaccines.

**At a 2010 Aspen Ideas Festival, Gates seemed to imply that elderly patients ought to be killed rather than “wasting” resources on keeping them alive. He bemoaned the “lack of willingness” on the part of society to confront the choices between “spending a million dollars on the last three months of life for that patient” or laying off ten teachers!!!**

Gates proceeded to directly blame the poor response on lack of preparation, but also freedom. Yes, Bill Gates blamed our freedoms for the spread of the virus.

In 2017, the Indian Government dialed back Gates' vaccine regimen and evicted Gates and his cronies from the NAB. Polio paralysis rates dropped precipitously.

In 2017, the World Health Organization reluctantly admitted that the global polio explosion is predominantly vaccine strain, meaning it is coming from Gates' Vaccine Program.

Indian government investigations charged that Gates funded researchers committed pervasive ethical violations: pressuring vulnerable village girls into the trial, bullying parents, forging consent forms, and refusing medical care to the injured girls. The case is now in the country's Supreme Court.

In 2010, the Gates Foundation funded a trial of a GSK's experimental malaria vaccine, killing 151 African infants and causing serious adverse effects including paralysis, seizure, and febrile convulsions to 1,048 of the 5,049 children.

ID2020 Summit, May 2016.

Simply put, ID2020 is looking to create a digital identification system that would store a wealth of personal information and that would go beyond the limits of national governments. The [official website of ID2020](#) states that a global digital identity is necessary to keep track of refugees and ID-less people in developing countries.

While answering a question about conducting business in the era of social distancing, Bill Gates replied that “digital certificates” will be used to determine who had COVID-19, who recovered from it, who was recently tested for it and who received the vaccine. This short (and unexpected answer) opened a gigantic pandora box of what could be in store in the near future:

Dr. Robert Redfield, director of the Centers for Disease Control and Prevention, sent a letter last week to the nation's governors with an urgent request. The Trump administration wanted them to do everything in their power to eliminate hurdles for vaccine distribution sites to be fully operational by Nov. 1.

30 Newspapers incorporated under this banner

**The Aug. 27 letter, obtained by McClatchy, asked governors to fast-track permits and licenses for new distribution sites. “The normal time required to obtain these permits presents a significant barrier to the success of this urgent public health program,” Redfield wrote.**

**“CDC urgently requests your assistance in expediting applications for these distribution facilities,” he continued, “and, if necessary, asks that you consider waiving requirements that would prevent these facilities from becoming fully operational by November 1, 2020.”**

**“The requirements you may be asked to waive in order to expedite vaccine distribution will not compromise the safety or integrity of the products being distributed,” he added.**

**Delivery firms have received guidance from Trump administration officials to prepare freezer farms in the heartland and get ready to load vaccines onto trucks no later than Nov. 1.**

The first vaccines most likely to emerge from Phase III clinical trials will pose exceptional challenges to public health officials, requiring storage in sub-zero temperatures and two doses per individual spread weeks apart.

**The inevitable mass vaccination campaign to eradicate COVID-19 would be the perfect opportunity to introduce a worldwide digital ID. This system would store a wealth of information about each individual (including vaccination history) and would be used to grant access to rights and services. Although Gates did not go into specifics, “digital certificates” could be linked to biometrics or a quantum dot tattoo.**

In December 2019, a group of researchers at the MIT published a study in [Science Translational Medicine](#) about the use of quantum dot tattoos to identify who people who received a vaccine.

Researchers from MIT might have a solution: they've created an ink that can be safely embedded in the skin alongside the vaccine itself, and it's only visible using a special smartphone camera app and filter.

In other words, they've found a covert way to embed the record of a vaccination directly in a patient's skin rather than documenting it electronically or on paper – and their low-risk tracking system could greatly simplify the process of maintaining accurate vaccine records, especially on a larger scale.

**"QUANTUM DOT TATTOO"**

**NEW "DIGITAL" VACCINE**

**"CERTIFICATE"**

The invisible “tattoo” accompanying the vaccine is a pattern made up of minuscule quantum dots – tiny semiconducting crystals that reflect light – that glows under infrared light. The pattern – and vaccine – gets delivered into the skin using hi-tech dissolvable microneedles made of a mixture of polymers and sugar. “It’s possible someday that this ‘invisible’ approach could create new possibilities for data storage, biosensing, and vaccine applications that could improve how medical care is provided, particularly in the developing world,” MIT professor and senior author Robert Langer said in the statement.

# Bill Gates' Quantum Dot Digital Tattoo Implant to Track COVID-19 Vaccine Compliance

by Afshin Yaghtin | Mar 24, 2020 | Current Events, End Times, Vaccines | 2 comments

Microsoft founder Bill Gates announced on March 18, 2020 during a "Reddit 'Ask Me Anything' session" that he is working on a new, invisible "quantum dot tattoo" implant that will track who has been tested for COVID-19 and who has been vaccinated against it.

## Quantum Dots Encode Vaccine History in the Skin

## **Biometric bioluminescence.**

**Bioluminescence is a “cold light” that derives from a chemical reaction within a living organism. Cold light means less than 20% of the light generates thermal radiation, or heat.**

Most bioluminescent organisms are found in the ocean; fish, bacteria, and jellies. Some bioluminescent organisms, including fireflies and fungi, are found on land. There are almost no bioluminescent organisms native to freshwater habitats. Until now. (Meaning people)

## Luciferase Chain Reaction to ID2020

Scientists say humans can utilize bioluminescence through a chemical enzyme called **Luciferase**. Enzymes catalyze biochemical chain reactions in the body to make things happen.

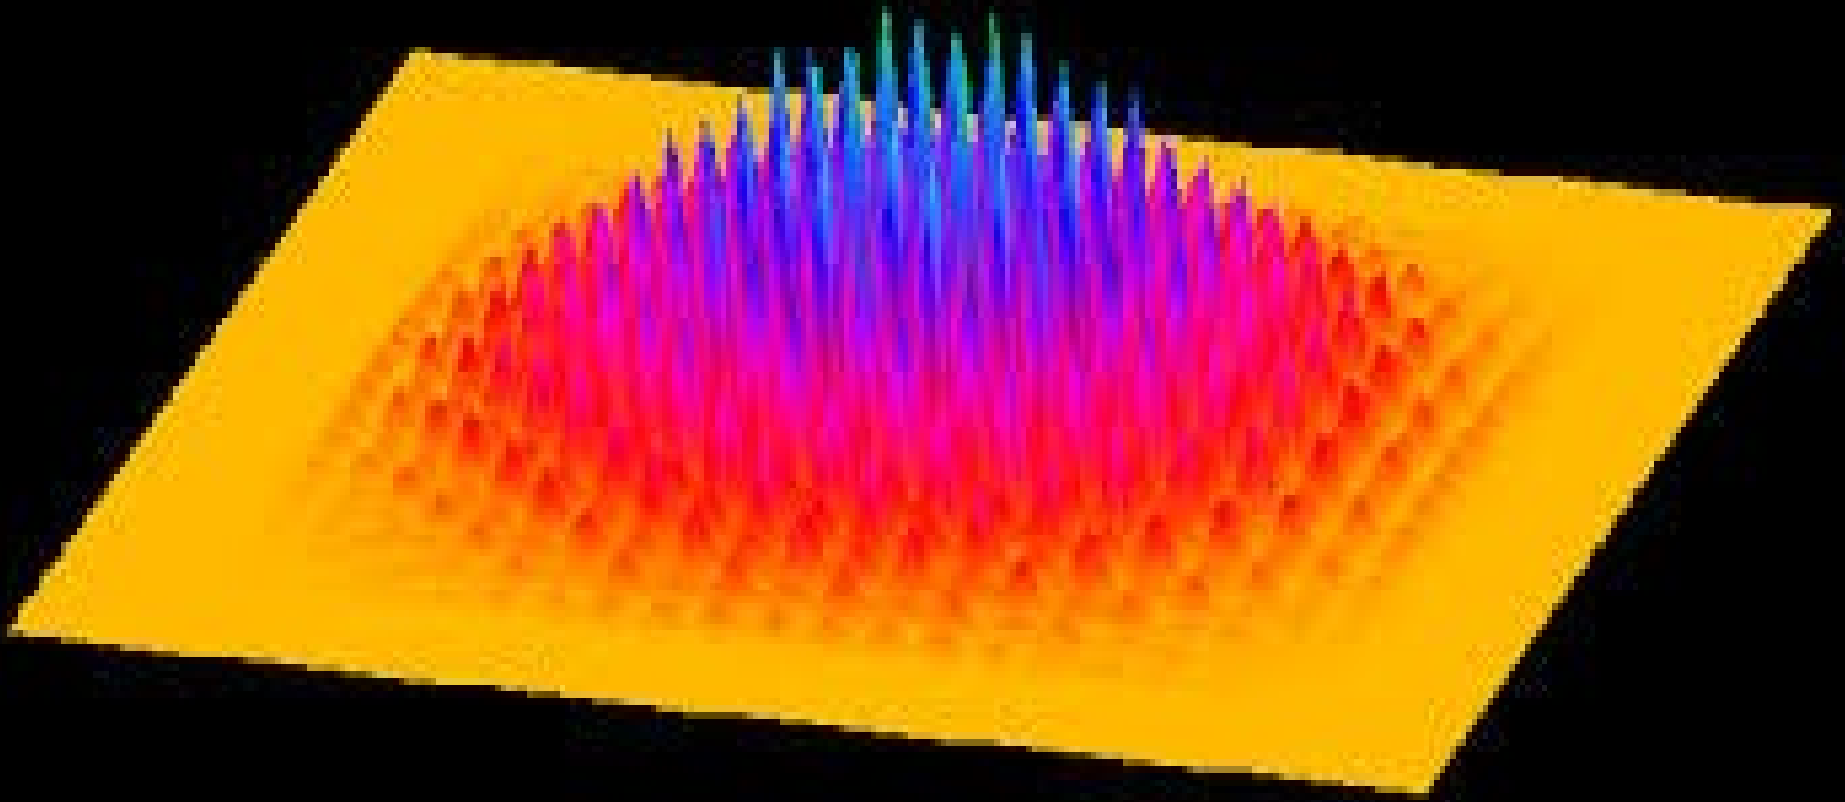

Researchers at MIT created a microneedle platform using *fluorescent* micro-particles called quantum dots (QD), which can deliver vaccines and at the same time invisibly encode vaccination history directly in the skin. Bill Gates calls it the Human Implantable Quantum Dot Microneedle Vaccination Delivery System.

<https://www.genengnews.com/topics/drug-discovery/quantum-dots-deliver-vaccines-and-invisibly-encode-vaccination-history-in-skin/>

The quantum dots are composed of nanocrystals, which emit near-infrared (NIR) light that can be detected by a specially equipped smartphone. Tests using the platform showed that QDs delivered to samples of human skin were still detectable after photo-bleaching that simulated five years of exposure sunlight, and they remained detectable for up to nine months when tested in rats.

The researchers designed their dye to be delivered by a microneedle patch rather than using a traditional syringe and needle. Such patches are now being developed to deliver vaccines for measles, rubella, and other diseases. The QD are composed of nanocrystals, which also emit near-infrared (NIR) light that can be detected with a specially equipped smartphone using an app. The dots are about **4 nm in diameter**, and are encapsulated in biocompatible micro-particles that form spheres about 20  $\mu\text{m}$  in diameter. This encapsulation allows the dye to remain in place, under the skin, after being injected.

**Forget the HIPAA Privacy rules. The MIT team set out to devise a method for recording vaccination information in a way that doesn't require a centralized database or other infrastructure, rather it is an "on-patient," decentralized medical record. No mention of adding or subtracting information, or hacking was disclosed.**

**The team wrote:  
Because these phones  
offer on-board processing  
power, camera  
applications, and  
inexpensive consumer-  
grade camera modules,  
they chose to adapt an  
existing smartphone to  
enable NIR imaging rather  
than build a completely  
new imaging system.**

# Wearable Biosensors

## Simulating Biotic Growth Patterns and Sensing Environmental Toxins

This project explores the use of 3D Printed wearable devices, body architectures, that are embedded with **BIOSENSORS**, *E. coli* bacteria that is genetically modified to **BIO-FLUORESCENCE** when exposed to specific environmental toxins, including Ozone/UV light, Sulfur Dioxide, and Heavy Metal Ion Stress. The bio-fluorescent *E. coli* **BACTERIA** is grown on **3D PRINTED SCAFFOLDS** and creates growth patterns through a phenomenon known as quorum sensing.

Intradermal QDs can be used to reliably encode information and can be delivered with a vaccine, which may be particularly valuable in the developing world and open up new avenues for decentralized data storage and biosensing.

**Biosensing is a new drop sensing method for faster testing of Covid-19, published June of 2020 in ACS Nano.**

Current COVID-19 verification tests require a few hours to complete, as verification of the presence of the virus requires the extraction and comparison of viral genetic material, a time-intensive process requiring a series of steps. The amount of virus in a sampling is also subject to error, and patients who have had the virus for a shorter period of time may test negative because there is not enough of the virus present to trigger a positive result.

<https://www.pandemictechnews.com/2020/07/21/droplet-biosensing-to-identify-covid-19-faster/> 70

**For fast sensing and analysis of these molecules, a laser beam is directed onto the spot with the packed-in molecules to generate their vibrational fingerprint light signals, a description of the molecules expressed in waveforms. This method of laser-enabled feedback is called surface-enhanced Raman spectroscopy. All of this happens in just a few minutes, and the fingerprint spectrum and frequency of the coronavirus can be quickly picked out of a lineup of the returned data.**

[FR] SYSTÈME DE CRYPTOMONNAIE UTILISANT DES DONNÉES D'ACTIVITÉ CORPORELLE

FIG. 1

## Abstract

[EN]

Human body activity associated with a task provided to a user may be used in a mining process of a cryptocurrency system. A server may provide a task to a device of a user which is communicatively coupled to the server. A sensor communicatively coupled to or comprised in the device of the user may sense body activity of the user. Body activity data may be generated based on the sensed body activity of the user. The cryptocurrency system communicatively coupled to the device of the user may verify if the body activity data satisfies one or more conditions set by the cryptocurrency system, and award cryptocurrency to the user whose body activity data is verified.

Un serveur peut fournir une tâche à un dispositif d'un utilisateur qui est couplé de manière à communiquer avec le serveur. Un capteur couplé de manière à communiquer avec un dispositif de l'utilisateur ou compris dans ce dernier peut détecter l'activité corporelle de l'utilisateur. Des données d'activité corporelle peuvent être générées sur la base de l'activité corporelle détectée de l'utilisateur. Le système de

What changes are we going to have to make to how businesses operate to maintain our economy while providing social distancing?

The question of which businesses should keep going is tricky. Certainly food supply and the health system. We still need water, electricity and the internet. Supply chains for critical things need to be maintained. Countries are still figuring out what to keep running.

Eventually we will have some digital certificates to show who has recovered or been tested recently or when we have a vaccine who has received it.

## Here is the summary!

- Microneedle vaccine does not fully dissolve-tips remain
- Microneedle vaccine delivers quantum dots that glow under IR
- Microneedle delivers semiconductors, dyes, active agents such as DNA modifiers, and other metallic components like silver
- Microneedle vaccine creates a biometric identification through patterns, spacing, and fluorescent wavelengths
- Microneedle vaccine uploads to Cloud to validate medical records
- Microneedle vaccine will serve as a mark for buying and selling through patent application ending in 060606
- Bill Gates and ID2020 and House Bill 6666 all promote this agenda

Luciferases can be **produced** in the lab through genetic engineering for a number of purposes. **Luciferase** genes can be synthesized and inserted into organisms or transfected into cells. ... In the **luciferase** reaction, light is emitted when **luciferase** acts on the appropriate luciferin substrate.
