

The background of the slide is a dark red color, densely populated with numerous 3D models of coronavirus particles. These particles are depicted with their characteristic spherical shape and a surface covered in prominent, irregular spikes. The particles vary in size and are scattered across the entire frame, creating a sense of a widespread infection or digital plague.

Rev 16:1-2 Then I heard and paid attention to a loud voice from the temple saying to the seven messengers, “Go and pour out to cause the earth to fully experience the seven bowls of the wrath, fury and intense anger of Yahuah.” And the first went and poured, causing the earth to fully experience his bowl, and there was an evil, loathsome and painfully wicked sore and festering wound on the people who had the mark, brand, stamp and image of the beast and who worshiped and paid reverence and obeisance to his image.

Isaiah 13:12-14

I will make humanity more rare, scarce and precious than gold and humankind more than the gold of Ophir (Ophir's gold was of a very good quality).

Therefore and for this reason I will make the heavens tremble and shake, and the earth will quake from its place because of the wrath, fury and rage of Yahuah of hosts, and in the day His anger burns.

Then this shall happen and take place; like a hunted gazelle or sheep with none to gather them, they will each turn to his own people, and they will each flee to his own land.

Vaccines now represent the newest battle line between the 1% and the 99% and between international and individual prerogatives. In the 21st century it is the needle not the bomb that causes death and disease at an unimaginable scale and at an unpredictable cost to the genetic endowment of mankind.

The Enemy Within – The Great Government Deception – Military Secrecy Revealed!
By Chip Tatum June 2, 2018
<http://chiptatum.com/2018/06/02/the-enemy-within-the-great-government-deception-military-secrecy-revealed>

When Army Reservist *Rachael Lacy* got her military shots, she became deathly ill in a matter of weeks.

The coroner listed “recent smallpox and anthrax vaccination(s)” as contributors to her death (4/4/2003).

Yet the military doesn't mention Lacy under "Noteworthy Adverse Events" in an article in the Journal of the American Medical Association touting its smallpox vaccine success. It claims no deaths.

It also makes no mention of a cluster of unexplained pneumonia cases that were beginning to surface. The military says it's investigating the pneumonia reports along with federal health officials.

But experts tell us the military should have reported them as possible post-vaccine illnesses.

In the medical world, illnesses and deaths after inoculations – even if they're not obviously related to the vaccines – are supposed to be reported so experts can look for new side effects nobody knew about. But there are questions as to whether the military is coming clean about all the adverse events.

Besides Lacy, the military also discounted the death of a National Guardsman who had a heart attack and NBC correspondent *David Bloom* who died of a blood clot after getting military shots for his war duties. It doesn't mean vaccines caused the deaths, but they're supposed to be reported and independently checked for patterns.

The line was at Fort McCoy, Wis., where Lacy and others from the 452nd Combat Support Hospital unit waited to get anthrax, smallpox and other vaccinations while preparing to deploy to Afghanistan.

Instead of serving overseas, Lacy got terribly sick within days. She died a month later.

A man with a beard and glasses, wearing a brown jacket, is holding a framed portrait of a young girl. The background is a blurred outdoor setting with trees and a building. A yellow text box is overlaid on the right side of the image.

“At the military hospital, no one wanted to pay attention to the possibility that what was happening was related to the vaccine,” says Moses Lacy, Rachael’s father.

Seven months after Rachel Lacy's death, medical and vaccine experts hired by the government ruled that her death was a "possible" or "probable" result of the vaccinations.

9/26/2020

It's the only death that the Pentagon has officially acknowledged as being possibly related to the anthrax vaccine. The fact that Lacy got five vaccinations that day – including a smallpox shot – clouds the issue considerably.

The vaccinations triggered her illness, but which vaccination did it? Or was it a combination of all?

9/26/2020

Officially, Lacy died of massive failures of lungs, heart and other organs. But the autopsy found widespread evidence of autoimmune problems as the likely cause of those failures.

The speed of her declining health was also remarkable. Shortly before the shots, Lacy got high scores on physical fitness tests. Two days after the inoculations, she could barely draw a breath.

TOP AUSTRALIAN VACCINE DOCTOR RAISES VIRUS DOUBTS

ADAPTED TO INFECT HUMANS

SARS-COV-2 is uniquely adapted to infect humans

DR NIKOLAI PETROVSKY

'This is a new virus that has never been in humans before, but it has an extraordinarily high binding to human receptors, which is very surprising'

LAB COINCIDENCE?

The most closely-related known viruses were studied in Wuhan lab 'Lab leak remains a possibility'

NO ANIMAL HOST

'We haven't found an intermediate host, or even the virus in any animal yet'

PROTEIN BINDS TO HUMAN RECEPTOR

SARS-CoV-2 spike protein has higher overall binding energy for humans ACE2 than other species

ENTERED HUMAN BODY FROM DAY ONE

Dr Petrovsky said the virus was not a normal animal to human virus since it had the 'exceptional' ability to enter the human body from day one

As Nikolai Petrovsky from Flinders University [told](#) the Australian Broadcasting Corporation, these panels are "typically made up of doctors, a biostatistician and a medical representative of the sponsor company running the trial."

https://childrenshealthdefense.org/news/a-dangerous-inactive-ingredient/?utm_source=salsa&eType=EmailBlastContent&eId=362cc1c6-4ad0-472f-9cd5-3ff16de1f106

When an ingredient that could cause an allergic reaction, is a key component of a vaccine (a potentially mandated vaccine to combat a worldwide pandemic) our concern should be commensurately raised. When the vast majority of those who have an immune response to the substance do not realize what they are allergic to and therefore cannot reasonably be expected to avoid it, we have the potential for a medical crisis within a medical crisis.

Just what is this dangerous inactive ingredient?

Polyethylene Glycol, otherwise known as PEG, Macrogol, Carbowax and many other names when combined with other substances, is not a household word unless your house holds biochemists. It is classified as biologically inert by our FDA. It is the “Gold Standard” for use in many medications to increase the blood clearance time, or in other words, the time it remains in one’s system, thereby enhancing drug effect.

It is also used in drug manufacturing as an excipient for long term stabilization, bulking, and other therapeutic enhancements. It is used as a coating to prevent bacterial adhesion on orthopedic screws and sutures.

In addition to medical uses, PEG is also used in cosmetics, foods, industrial applications, and other health and beauty products such as soaps, shampoos, toothpastes. It is also used as an e-cigarette liquid.

PEG is everywhere in our environment, which is what many have surmised has led to a high percentage of the US population developing anti-PEG antibodies. This, of course, presents a significant challenge to those who rely on this substance in their manufacturing.

9/26/2020

Polyethylene glycol electrolyte solution can cause **dangerous** or life-threatening side effects in people with these conditions. People with eating disorders (such as anorexia or bulimia) should not use this medicine without the advice of a doctor

Macrogol, also known as polyethylene glycol, is used as a medication to treat constipation in children and adults. It is also used to empty the bowels before a colonoscopy. It is taken by mouth. Benefits usually occur within three days. Generally it is only recommended for up to two weeks.

Carbowax - A trademark for: any of a series of liquids or solids consisting of polyethylene glycols or their ether derivatives, used as dispersing agents, surfactants, water absorbents, etc.

PEG and Covid-19 Vaccines

There are at least three fast-tracked vaccines being produced and tested at this time, obviously meant for widespread use, some even arguing mandatory use, which contain PEG: Moderna's mRNA1273, and BioNTech/Pfizer's BNT162b1 and b2.

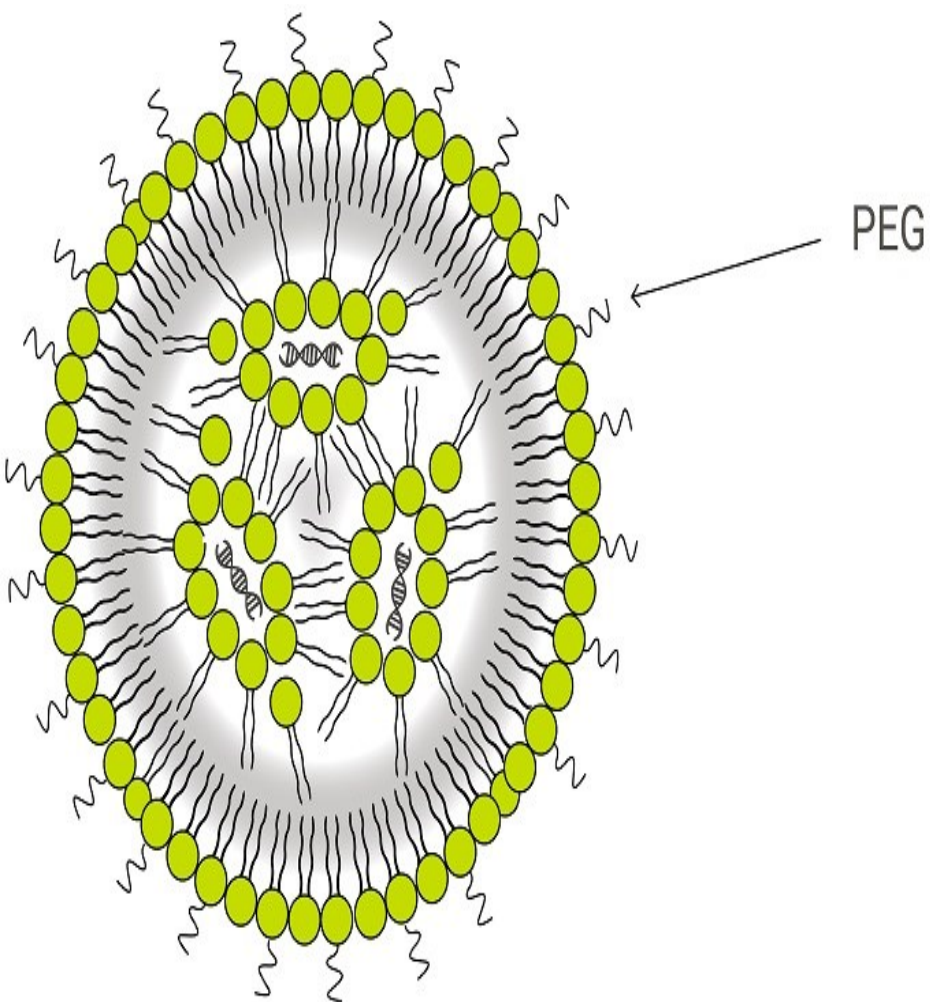

These mRNA vaccines trick your cells into producing Covid-19 proteins—pieces of the virus which are non-infectious. These proteins then elicit an immune response to fight the real virus.

They use a pegylated Lipid Nanoparticle (LNP) as the delivery mechanism for the mRNA. Think of the LNP as a miniscule (less than 100 billionth of a meter) bubble containing the mRNA.

This “bubble” is coated with PEG (DSPE MPEG2000 in Moderna’s case) to stabilize the carrier and assist it in getting to and into the target cells.

PEG assists with the “getting to” portion of the journey by preventing the bubble from breaking down before it reaches its target. That is what some call PEG’s stealth properties—its ability to mask and protect the carrier from the body’s normal defenses against foreign substances.

9/26/2020

Figure 2 Schematic structure of lipid nanoparticles.
Abbreviation: PEG, polyethylene glycol.

The first COVID-19 vaccine trial began in mid-March. The potential vaccine is funded by the Bill & Melinda Gates Foundation and was developed by scientists at the National Institute of Allergy and Infectious Diseases (NIAID) in partnership with the pharmaceutical company Moderna, Inc.

moderna™

messenger therapeutics

Question to Robert Kennedy: Please speak to the problems you see with DNA-altering vaccines, since some of the proposed vaccines, including Moderna's, are using genetic engineering.

Continuing with Robert Kennedy Jr.'s
interview:

KENNEDY: MRNA vaccines function by altering DNA expression. There are many vaccines developed using aborted fetal tissue. And that also has health implications, because fetal tissue has been rendered carcinogenic.

edytka1754

A lot of the fetal tissue they use in vaccines was taken from a 14-week-old child who in 1966 was forcibly aborted from a woman in a mental institution. There are DNA snippets from that child that are injected with the vaccines. And we have no idea what the implications are for sexuality when male DNA is injected into female babies, or for cancer when tumor cells are injected into healthy babies.

These are frightening scientific and health implications, even putting the moral implications aside. There is a possibility that they are permanently altering the human genome with the mass vaccination of this child's DNA.

I'm finally making my way around to the burning question about COVID-19: Is this a wild virus or a created virus?

KENNEDY: That is unclear. There is strong circumstantial evidence that the virus could be the product of not so much genetic engineering as accelerated evolution, and that is the mechanism that is used to create vaccines and bioweapons. There was a research program that was being used at the Wuhan lab, and we know this because they published many studies on it. It's a way of creating "gain of function" organisms. In other words, created organisms that are very virulent and extremely transmissible.

Lab monkeys infected with coronavirus
in race to find life-saving vaccine

Your answer might strike some as controversial. Why would anybody do such research?

KENNEDY: The reason is, it's a way of developing vaccines. So what they do is, they take a wild coronavirus and then they grow it on pangolin tissue. Then they'll take it off of pangolin tissue. They take the colonies from the pangolin tissue and regrow those colonies on mouse brains.

And they'll take the colonies from mouse brains and they'll regrow them on monkey vero kidney cells. And then finally, they will grow them on human lung tissue. It's a way of teaching the virus to jump species. You're training it.

Normal monkey vero kidney cells

When they do that, they will give that trained virus to rats that have been genetically engineered to have human DNA to see if they can make the rats sick from coronavirus.

And when they prove they can make the rats sick, they then try to develop a vaccine to stop the spread of the thing. And it's called "gain of function" research. Many doctors and scientists have criticized it as having little benefit historically, of adding little to the knowledge while taking huge risks.

**From a post of Fiona Barnett (SRA survivor) – on her Wordpress blog:
<https://fionabarnett.org/2020/08/28/mainstream-media-finally-admit-most-vaccinations-contain-dead-babies/>**

**The foetuses used are from
decades ago**

**The foetal cells used in vaccine
development are derived from
a small number of foetuses
which were legally terminated
decades ago.**

**The Oxford vaccine uses HEK (human
embryonic kidney) 293 cell lines, obtained
from a female foetus in the Netherlands in
1973.**

"We're using tissues that were from fetuses that were aborted 40, 50, 60 years ago," Dr. Lott said.

"It doesn't require newly aborted fetuses."

While living human cells can only divide around 50 times, those foetal cells have been genetically modified so they can divide an infinite number of times.

That's why we can use the cells that we harvested [decades ago] today," Dr. Lott said.

"They're not the actual original cells, they've been immortalized and then propagated over the decades."

This means we'll never need to replace specimens used in development.

"Just by analogy, buying ivory is illegal [because] if you create a market for ivory, then it creates the demand to kill more elephants," Dr. Lott said.

So instead fetuses are used as flavorings!!

In this case, that's not happening because these foetuses were aborted 60 years ago, 50 years ago, and using these immortalized tissues now is not going to create a need to go and get new ones."

In fact, scientists would prefer to keep using HEK 293 cell lines — because they have been repeatedly tried and tested in a laboratory setting and found to be safe.

"When you're making a vaccine you require safety testing," Dr. Lott said.

"If we went back and used a different cell type, you're throwing an unknown into the consideration.

**"So that will severely slow down your ability
to make these things.**

**"Using HEK 293, we've used it for
decades and we know that it's
safe."**

Oxford, AstraZeneca to resume coronavirus vaccine trial

Interesting that Dr. Lott says that the OXFORD vaccine is now safe because of what they use. AstraZeneca is working with Oxford to find the vaccine for COVID19 but had to stop because a test patient came down with TM (transverse myelitis – which causes all kinds of problem, paralysis being one issue) though they just call it a side effect – but are now resuming the test. They refuse to say what the side effect was – though they did say she developed “severe” neurological symptoms, which is what TM is. They’re NOT overly concerned at what has happened, but did say “it is expected that some participants will become unwell”. Don’t you find that interesting, considering what Dr. Lott said that the strain they use for vaccines is SAFE?

Children's Health Defense

https://childrenshealthdefense.org/news/sharks-killed-glaxo-vaccine/?utm_source=salsa&eType=EmailBlastContent&eld=353fee49-38e3-4580-afce-1b186880d49a

OCTOBER 01, 2020

Half a Million Sharks Could Be Killed to Make Vaccine

9/26/2020

46

Drug maker GlaxoSmithKline may need to slaughter half a million sharks to harvest squalene, an oil made in shark livers, to make a new line of COVID jabs.

do more
feel better
live longer

Glaxo mixes squalene with a witches' brew of proprietary surfactants to produce its controversial AS03 vaccine adjuvant.

Adjuvants are compounds that amplify immune response to hyper-stimulate the immune system. They are associated with a variety of autoimmune diseases.

Scientific studies have linked squalene adjuvants to [Gulf War syndrome](#) and to a wave of debilitating [neurological disorders](#) including epidemics of narcolepsy caused by Glaxo's H1N1 Pandemrix vaccine during the 2009 swine flu "pandemic." One study showed a [13-fold increased risk](#) of narcolepsy in children who received Pandemrix.

U.S. Food and Drug Administration

Protecting and Promoting Your Health

4 to 2 | Follow FDA

FDA News Release

FDA approves first seasonal influenza vaccine containing an adjuvant

The U.S. Food and Drug Administration today approved Fluzel, the first seasonal influenza vaccine containing an adjuvant, approved for people 65 years of age and older.

Fluzel, which is manufactured using an egg-based process, is formulated with the adjuvant MF59, an oil-in-water emulsion of squalene oil. Squalene, a naturally occurring substance found in humans, animals and plants, is highly purified for the vaccine manufacturing process. Adjuvants are incorporated into some vaccine formulations to enhance or direct the immune response of the vaccinated individual.

9/26/2020

The devastating cascade of brain injuries to children and health care workers forced the termination of that Glaxo vaccine after European governments used only a small fraction of the jobs they had purchased from Glaxo. A recent study [links squalene to carcinomas](#).

In a bizarre and reckless twist, Glaxo has revived the dangerous adjuvant as its hall pass to the COVID-19 money orgy.

A close-up photograph of a medical syringe with a needle inserted into a vial. The syringe is positioned diagonally from the bottom right towards the center. The vial is partially visible on the left side. The background is a blurred blue color. The text is overlaid in the top right corner.

The company said it would manufacture a billion doses of this adjuvant for potential use in coronavirus vaccines. Around 3,000 sharks are needed to extract one ton of squalene.

Shark Allies, a California-based group, said Glaxo will kill around 250,000 sharks to make enough AS03 for the world's population to receive one dose of its COVID-19 vaccine.

If, as expected, two doses are needed, half a million sharks must die.

Glaxo declared that it would be producing 1 billion doses of AS03 “to support the development of multiple adjuvanted COVID-19 vaccine candidates.”

INNOVAX
厦门万泰

Glaxo has developed partnerships with multiple companies, including its behemoth rival Sanofi, China's Clover Biopharmaceuticals and Innovax Biotech in the city of Xiamen.

3/26/2020

Dr. Richard Hatchett
CEO of CEPI

“By investing in a range of partners and vaccine technologies, we are giving ourselves the best chance of developing a vaccine that can stop COVID-19 in its tracks.”

CEPI

Glaxo has also agreed to make the technology available to the Coalition for Epidemic Preparedness Innovations for COVID vaccines in Australia and elsewhere.

Glaxo said it is focusing on what it considers a “proven technology” that will give the company “several shots on goal.”

A COVID-19 nasal swab test ruptured the lining at the base of a US woman's skull, causing cerebrospinal fluid to leak from her nose and putting her at risk of brain infection, doctors reported in a medical journal Thursday. The patient, who is in her 40s, had an undiagnosed rare condition and the test she received may have been carried out improperly, a sequence of improbable events that means the risk from nasal tests remains very low.

Coronavirus test caused brain fluid leak in US patient: Study

A medical member of the Austrian army performs a coronavirus disease (COVID-19) nasal swab test on a member of the militia during the coronavirus outbreak in Vienna, Austria, May 4, 2020. (AFP)

Anthony Fauci has been a huge champion of gain of function. President Obama found out about it in 2014, that Fauci was doing this, and that they had released a number of viruses.

Some 200 scientists signed a petition angrily denouncing these experiments. And Obama shut them down. But Fauci simply moved his operation to the Wuhan lab and started funding gain of function studies in Wuhan for the same purpose — to develop a coronavirus vaccine.

President Trump, when he came into office, cut funding to the biosecurity agency inside the White House that was funding those studies.

The funding ran out in Wuhan on September 30, 2019, and the scientists there were dismissed. One hypothesis is that those scientists may have accidentally or even deliberately released the virus because the spread of the virus could have given them job security.

COVID-19 Not Novel - Immunity Exists in Global Population

Published on July 31, 2020

<https://www.linkedin.com/pulse/covid-19-novel-immunity-exists-global-population-stephen-m-apatow/>

BERTOLETTI

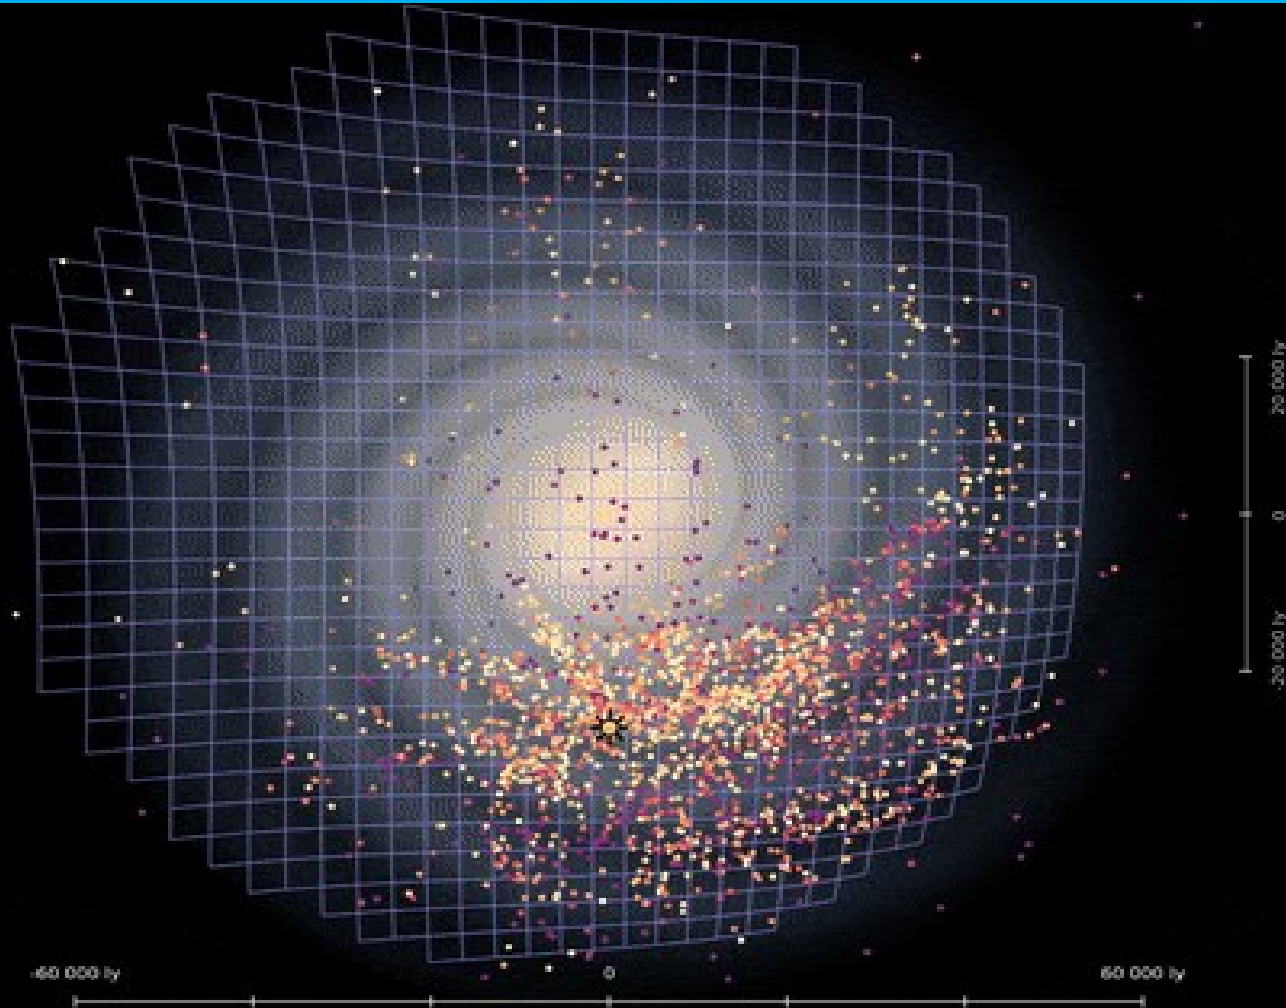

LABORATORY

“Our team also tested uninfected healthy individuals and found SARS-CoV-2-specific T cells in more than 50 percent of them. This could be due to cross-reactive immunity obtained from exposure to other coronaviruses, such as those causing the common cold, or presently unknown animal coronaviruses. It is important to understand if this could explain why some individuals are able to better control the infection,” said Professor Antonio Bertolotti, from Duke-NUS’ Emerging Infectious Diseases (EID) program, who is the corresponding author of this study. [Scientists Uncover Evidence That a Level of Pre-Existing COVID-19 / SARS-CoV-2 Immunity Is Present in the General Population:](#) ScienceDaily, 25 July 2020.

•Singapore study shows that SARS-CoV-2-specific T cells are present in all recovered COVID-19 patients.

•These T cells were also found in all subjects who recovered from SARS 17 years ago, and in over 50% of both SARS-CoV-1 and SARS-CoV-2 uninfected individuals tested, suggesting that a level of pre-existing SARS-CoV-2 immunity is present in the general population.

•Infection and exposure to coronaviruses induces long-lasting memory T cells, which could help in the management of the current pandemic.

SARS - Overview

Department of Microbiology, The University of Hong Kong and the Government Virus Unit, Department of Health, Hong Kong SAR China

- **The World Health Organization formally announced on 4/16/03 that a new pathogen, a member of the coronavirus family never before seen in humans, is the cause of Severe Acute Respiratory Syndrome (SARS).**

SARS: Genomic Challenges

- **Each gene of SARS-CoV has only 70% or less identity with the corresponding gene of the known coronaviruses.**
- **Thus, SARS-CoV was only dis-tantly related to the known coronaviruses of humans and animals.**
- **Phylogenetic analysis suggested that SARS-CoV did not fit within any of the three groups that contain all other known coronaviruses.**

FAUXLEX

April 12, 2020 at 9:53 am

Any instances where chromosome 8 had been unzipped for replication would leave the matching sequence available for the PCR primer to anneal (harden). This might not cause full replication by the PCR process, but if the test is so touchy you would really think this could throw off their results. If as you say plain water originally tested positive.

A **primer** is a short, single-stranded DNA sequence used in the polymerase chain reaction (**PCR**) technique. In the **PCR** method, a pair of **primers** is used to hybridize with the sample DNA and define the region of the DNA that will be amplified.

You would think they would have some technology to pick PCR primers that selects against sequences already found within human DNA. They also should have gone with a primer longer than 18 characters if they want reliable results. These tests are going to have a huge rate of false positives and/or negatives to the point where it's questionable how much we can rely upon it. Let alone the idea that 80% of people who test positive show no outward symptoms. We need to end these draconian lockdowns immediately.

To reiterate, my theory only makes sense if you take the “virus” narrative out of the equation, since it was there to obscure all along. If the PCR test is testing for SNPs encoded in DNA/chromosomes (in this one case with chromosome 8, as caught by FAUXLEX – there are most likely others being tested and corrected for as well), then this is all an extension of a massive epigenomics R&D operation (albeit highly classified and involving those with high security clearances).

Single nucleotide polymorphisms (SNPs) are a type of polymorphism involving variation of a single base pair. Scientists are studying how single nucleotide polymorphisms, or SNPs (pronounced "snips"), in the human genome correlate with disease, drug response, and other phenotypes.

Epigenomics is the study of the complete set of epigenetic modifications on the genetic material of a cell, known as the epigenome.

Kary Mullis, himself, set forth that the PCR test should only ever be used in R&D, and NOT as a diagnostic tool. Hence, I am suggesting that this is precisely how it is being utilized – even though it appears to be for diagnosis of said viral infection. With that said, the entire lot of “frontline” doctors and nurses shown all over the mockingbird media are in reality part of a massive, global simulation (functional pandemic preparedness exercise). Even “Peekay’s” recent compilation of the spectacle of singing and dancing doctors and nurses should speak for itself — there is NO emergency at the present moment.

PCR was born in the mind of Kary Mullis on a moonlit night in northern California in 1983. As he drove through the hills, Mullis was thinking about the precision of DNA replication, and a way to tap into it popped into his mind. He excitedly explained his idea to his girlfriend and then went home to think it through. “It was difficult for me to sleep with deoxyribonuclear bombs exploding in my brain,” he wrote much later. (A quote so common that I can’t find the original source, which I think was Scientific American.)”

Homo sapiens chromosome 8, GRCh38.p12 Primary Assembly

Sequence ID: NC_000008.11 Length: 145138636

Range 1: 63648346 to 63648363 is "CTCCCTTTGTTGTGTTGT"

This was important enough that I wanted to get it out immediately. My research into the NCBI database for nucleotide sequences has lead to a stunning discovery. One of the WHO primer sequences in the PCR test for SARS-CoV-2 is found in all human DNA!

The sequence
“CTCCCTTTGTTGTGTTGT” is an 18-
character primer sequence found in
the WHO coronavirus PCR testing protocol
document. The primer sequences are what
get amplified by the PCR process in order to
be detected and designated a “positive” test
result. It just so happens this *exact same* 18-
character sequence, verbatim, is also found
on Homo sapiens chromosome 8! *As far as I
can tell, this means that the WHO test kits
should find a positive result in all humans.*

Enoch 16:3 "You were once in heaven, but not all the mysteries of heaven are open to you, and you only know the rejected mysteries. Those ones you have broadcast to the women in the hardness of your hearts and by those mysteries the women and men multiply evil deeds upon the earth." Tell them, "Therefore, you will have no shalom!"

So if this is what Yahuah told the messengers – "only the rejected mysteries were open to them" – do we really think that man can do what the messengers couldn't?

The COVID-19 is based on mRNA technology. The mRNA (messenger RNA) provides instruction taken from DNA to synthesis proteins in cell ribosomes. The vaccine would “introduce” mRNA, foreign to your body, that would contain instructions from the DNA of whatever they plan injecting into you to synthesize the proteins in your cells.

Remember, the “new coronavirus” has not even been isolated. And, in the following video, you may understand why.

<https://yummy.doctor/blog/the-virus-deception/>

You do not CATCH viruses...but you can be injected with them and this causes the process of elimination of said particles with SYMPTOMS which is the bodily method to remove the wastes. Non-self must be rigorously removed by the body.”

Wearing a mask will do NOTHING to stop a virus even if it was infectious as the holes in the mask are too large. It will hinder your oxygen which you need to stay well. Using toxic hand sanitizers only adds more problems.

https://www.westernjournal.com/study-finds-dominant-strain-covid-may-mutated-getting-around-masks/?utm_source=Email&utm_medium=CTBreaking&utm_campaign=wj-breaking&utm_content=conservative-tribune&ats_es=305ad2822284459cbe4405a2b820d718

9/25/2020

A new study released Wednesday found that the novel coronavirus may have mutated to get around interventions such as mask-wearing.

David Morens, a virologist at the National Institute of Allergy and Infectious Diseases, reviewed the [study](#) and said it suggests the virus has become more transmissible and could “have implications for our ability to control it.”

“Wearing masks, washing our hands, all those things are barriers to transmissibility, or contagion,” Morens said.

A dramatic night photograph of a massive lightning bolt striking a building. The lightning bolt is exceptionally large and complex, branching out in a tree-like pattern across the dark sky. The main trunk of the bolt strikes a building in the middle ground, which is illuminated by its own light. The surrounding sky is dark with other smaller lightning bolts visible. In the foreground, a body of water reflects the intense light of the lightning and the building. The overall scene is one of powerful natural energy.

“But as the virus becomes more contagious it statistically is better at getting around those barriers.”

“Although we don’t know yet, it is well within the realm of possibility that this coronavirus, when our population-level immunity gets high enough, this coronavirus will find a way to get around our immunity,” Morens said.

“If that happened, we’d be in the same situation as with flu. We’ll have to chase the virus and, as it mutates, we’ll have to tinker with our vaccine.”

Synthetic genes injected into billions of humans would form a grand experiment to create an altered species.

Of course, there is no informed consent. The human guinea pigs have no knowledge of what is being done to them.

And what would be the objectives of this lunatic research program? They would vary. On a simplified level, there would be two. Create weaker and more docile and more obedient and more dependent humans. On the other side, create stronger and healthier and more intelligent and more talented humans. Obviously, the results of the latter experiments would be applied to the “chosen few.” And clearly, some of this research will be carried on inside the military. Secrecy is easier to maintain, and the aim to produce “better soldiers” is a long-standing goal of the Pentagon and its research arm, DARPA.

The pandemic influenza vaccine needles deliver dozens of small, nano-sized computer chips into the blood of each individual being vaccinated. **These “nano-chips” are designed to pass the human blood-brain barrier and eventually lodge in the brain’s neurons.** After reaching their intended final destination in the human brain neurons, these incredible nano-chips then are designed to communicate via satellite with a covert master computer, and the unsuspecting victim becomes an unwilling spy tool. The victim’s eyes become the NSA’s remote camera, and their ears become their listening device. This of course, is very ingenious, to say the least – but very, very dangerous to human freedom and privacy. The new RFID chips have a whopping 128-bit ROM capacity (as much as many laptop computers) for storing a unique 38 digit number, which is then placed into the master computer’s data base along with the chip’s reading of the victim’s unique DNA structure. *Every human thought, reaction, hearing, and visual observation causes a certain neurological potential, spikes, and patterns in the brain and its electromagnetic fields, which can now be decoded into thoughts, pictures, and voices at the master computer.* Electromagnetic stimulation via implanted microchips can therefore change a person’s brainwaves and affect muscular activity, causing painful muscular cramps experienced as torture, or on the other extreme, can stimulate the brain with euphoria and feelings of extreme peace when the individual follows the master computer’s instruction.

Get ready for the depopulation kill shots that cause severe neurological damage and lobotomize anyone stupid enough to take them. Even mainstream media outlet CNBC.com is now reporting that vaccine trials conducted by Moderna and Pfizer are producing extreme side effects in trial subjects.

GLOBAL DEPOPULATION

87

High fever, body aches, headaches and exhaustion are some of the symptoms participants in Moderna and Pfizer's coronavirus vaccine trials say they felt after receiving the shots," reports CNBC:

CNBC goes on to explain that the study participants then claimed all the pain; "was worth it." Worth it for what? For a pandemic that's already over for people under the age of 70?

OW OW OW!

After getting the first shot on Aug. 18, he said he felt a little under the weather for several days with a low-grade fever. He got his second shot at a clinic on Sept. 15. Eight hours later, he said he was bed bound with a fever of over 101, shakes, chills, a pounding headache and shortness of breath.

He said the pain in his arm, where he received the shot, felt like a "goose egg on my shoulder." He hardly slept that night, recording that his temperature was higher than 100 degrees for five hours.

Does this sound like a “safe” vaccine to administer to hundreds of millions of people? **Full-on Covid-like symptoms?**

What CNBC isn't saying, of course, is that all these symptoms — extreme exhaustion, long duration headaches and violent shaking — are **signs of neurological damage happening in real time.**

Just in case you are wondering how much the media controls people, America has been vaccinating cattle for coronavirus for years, yet the news tells you it's new and gunna kill you all so go buy mask....

If the face masks work, Why the 6ft?
If the 6ft works, Why the face masks?
If they both work, Why the lockdown?
If all three work, Why the vaccine?
If the vaccine is safe,
Why the “No Liability” clause?

USA

The National Childhood Vaccine Injury Act of 1986

1. Shields vaccine manufacturers from liability for death and disability caused by their vaccines.
2. Removes financial incentives for manufacturers to produce safe vaccines.

THINK!

Enoch

58:2 "Blessed are you, righteous and elect ones, for splendor is your portion."

58:3 The righteous ones shall be in the light of the sun and the elect ones in the Light of Eternal Life which has no end, and the days of the life of the kodesh ones cannot be numbered.

58:4 They shall seek light and find righteousness with YAHUAH of Hosts. Shalom be to the righteous ones in the Shalom of the Eternal YAHUAH!

58:5 *After this, it shall be told to the kodesh ones in heaven that they should **scrutinize the mysteries of righteousness, the gift of faith**, for the sun has shined upon the earth and darkness is over.*

58:6 *There shall be a light that has no end, and they shall not have to count days anymore. For already darkness has been destroyed, **light shall be permanent before YAHUAH of Hosts, and the light of uprightness shall stand firm forever and ever before YAHUAH of Hosts.***

Psalm 112:7-8

He is not in fear of, intimidated or frightened of bad news, distress, calamity or misfortune; his heart is steadfast, established and secure in Yahuah. His heart is sustained and supported; he will not be afraid or intimidated, until he perceives and makes judgements on his adversaries.
