BILL & MELINDA
GATES *foundation*

VISITOR CENTER

From the book: “HIDDEN HISTORY” by Donald Jeffries

The Bill and Melinda Gates foundation’s primary goal is to provide VACCINES to Africans – which is really nothing more than a back-door eugenics program.

Trevor Mundel

PRESIDENT,
GLOBAL HEALTH

Dr. Trevor Mundel leads the foundation's efforts in research and development of health solutions, including vaccines, drugs, and diagnostics.

The Bill & Melinda Gates Foundation announced today that Trevor Mundel, who currently heads the development team of pharmaceutical giant Novartis International AG, will take over as president of the its Global Health Program on 1 December. Mundel, a physician and pharmaceutical scientist, will replace Tachi Yamada, who retired as president of the program in June.

AGRICULTURAL DEVELOPMENT

ROB HORSCH

← BACK

Print

Rob Horsch, deputy director, leads the Agricultural Research and Development team which manages a portfolio of grants aimed at improving agricultural productivity, reducing farmer risk, and developing more nutritious versions of the staple crops grown and consumed by farm families, including varieties that thrive in different soil types and are resistant to disease, pests, and environmental stresses such as drought.

Prior to joining the foundation in 2006, Rob was the leader of International Development Partnerships at Monsanto Company and involved in a number of public private partnerships for agricultural development. Rob is a plant biologist and has served on the editorial boards of several leading journals in the plant sciences and as an advisor to the National Science Foundation and the Department of Energy. He was awarded the 1998 National Medal of Technology by President Clinton for contributions to the development of agricultural biotechnology.

Rob received his Ph.D. in Genetics at the University of California, Riverside, in 1979, and then conducted postdoctoral work in plant physiology at the University of Saskatchewan.

One wonders why on earth the Gates Foundation is now into agricultural development?? But it's good to see that they have hired someone that worked for Monsatan to gain experience in this field!!!

thegivingpledge

Warren Buffett gave the Gates Foundation 30 billion and teamed up with Gates in 2010 to promote the “Giving Pledge”-urging their fellow multi-billionaires to give at least ½ of their money to “charity”

Bill Gates is already on record anticipating that the widespread vaccination programs he funds and endorses will result in a significant reduction of the population.

THE Giving PLEDGE

Warren Buffett's goal for his Giving Pledge is to give away 99% of his wealth during his lifetime. Americans billionaires, other than Bill Gates and Warren Buffett, who have taken the Giving Pledge since 2010 include the following:

 <p>#196 ELI BROAD \$6.9B, investments</p>	 <p>#1372 STEVE CASE \$1.2B, AOL</p>	 <p>#466 JOHN DOERR \$3.4B, venture capital</p>	 <p>#731 BARRY DILLER \$2.4B, online media</p>	 <p>#5 LARRY ELLISON \$48B, Oracle</p>	 <p>#295 GEORGE LUCAS \$4.9B, Director, producer</p>
 <p>#687 MICHAEL MILKEN \$2.5B, investments</p>	 <p>#1565 JOHN MORGRIDGE \$1B, former Chair, Cisco Systems</p>	 <p>#73 RONALD PERELMAN \$14B, leverage buyouts</p>	 <p>#580 DAVID ROCKEFELLER \$2.9B, oil, banking</p>	 <p>#796 TED TURNER \$2.2B, cable TV</p>	 <p>#21 MARK ZUCKERBERG \$28.5B, Facebook</p>

Interesting that Ted Turner would donate to this, considering he's the one who put up the Georgia Guidestones – he's on board with reducing the population!!!

At a 2010 Aspen Ideas Festival, Gates seemed to imply that elderly patients ought to be killed rather than “wasting” resources on keeping them alive. He bemoaned the “lack of willingness” on the part of society to confront the choices between “spending a million dollars on the last three months of life for that patient” or laying off ten teachers!!!

More problems with O-care if medical and educational monies are somehow now related. But this just becomes an excuse.

POPULATION CONTROL

A lit candle with smoke rising from it, set against a dark background. The candle is white and cylindrical, with a dark wick. The smoke is white and billowing upwards. The background is dark and slightly out of focus.

<http://www.dcclothesline.com/2016/05/02/theres-a-plan-for-human-population-control-is-it-vaccines/>

All epidemics and pandemics of the past 30 years are fabrications of the UN system and its partners in crime at the national level for the purpose of lowering births below the magic line of replacement level fertility and, more recently, also for limiting life to an economically acceptable and environmentally sustainable age.

Vaccines now represent the newest battle line between the 1% and the 99% and between international and individual prerogatives. In the 21st century it is the needle not the bomb that causes death and disease at an unimaginable scale and at an unpredictable cost to the genetic endowment of mankind.

One of the graphics included in the *Epidemiology: Open Access* article is a global map depicting global health threats in 2016. [4]

This graphic illustrates that between 2010 and 2050, the smallest demographic is expected to fall between ages 0 to 64, which probably can be accomplished by the more vaccines they can pump into infants, children, and teens, in my opinion, and as Mr. Gates offers with his [population control](#) equation in his TED talk. The older folks are those who have not received all the vaccines that the last two generations have been mandated to receive under the guise of ‘herd immunity’ and school attendance regulations, I offer. Can the projected demographics below also be the compelling reason for all the “catch-up” vaccines adults and senior citizens now are being mandated to get

Percentage change in the world's population by age: 2010-2050. [9]

<http://www.thebigriddle.com/2015/12/murdered-holistic-doctors-discovered.html>

So apparently the holistic doctors who were all being killed in FL had found out via their research that the nagalase enzyme protein is INTENTIONALLY being added to the population via immunizations. Nagalase STOPS vitamin D from binding to the Gc protein. This completely strips a human being's body of it's natural ability to kill cancer cells.

Nagalase is a protein that's also created by all cancer cells. This protein is also found in very high concentrations in autistic children. And they're PUTTING it in our vaccines!!

<http://www.dcclothesline.com/2015/07/13/vaccines-an-ideal-covert-op-to-genetically-re-engineer-humans/>

The reference is the *New York Times*, 3/15/15, "Protection Without a Vaccine." It describes the frontier of research. Here are key quotes that illustrate the use of synthetic genes to "protect against disease," while changing the genetic makeup of humans. This is not science fiction:

"By delivering synthetic genes into the muscles of the [experimental] monkeys, the scientists are essentially re-engineering the animals to resist disease."

"The sky's the limit," said Michael Farzan, an immunologist at Scripps and lead author of the new study."

The first human trial based on this strategy — called immunoprophylaxis by gene transfer, or I.G.T. — is underway, and several new ones are planned."

“I.G.T. is altogether different from traditional vaccination. It is instead a form of gene therapy. Scientists isolate the genes that produce powerful antibodies against certain diseases and then synthesize artificial versions. The genes are placed into viruses and injected into human tissue, usually muscle.”

Here is the punchline:
“The viruses invade human cells with their DNA payloads, and the synthetic gene is incorporated into the recipient’s own DNA. If all goes well, the new genes instruct the cells to begin manufacturing powerful antibodies.”

Synthetic genes injected into billions of humans would form a grand experiment to create an altered species.

Of course, there is no informed consent. The human guinea pigs have no knowledge of what is being done to them.

And what would be the objectives of this lunatic research program? They would vary. On a simplified level, there would be two. Create weaker and more docile and more obedient and more dependent humans. On the other side, create stronger and healthier and more intelligent and more talented humans. Obviously, the results of the latter experiments would be applied to the “chosen few.” And clearly, some of this research will be carried on inside the military. Secrecy is easier to maintain, and the aim to produce “better soldiers” is a long-standing goal of the Pentagon and its research arm, DARPA.

Here is a quote from Princeton molecular biologist, Lee Silver, the author of Remaking Eden. It gives you a window into how important geneticists are thinking about an engineered future:

A futuristic laboratory scene with a woman in a black dress leaning over a seated woman, with a man standing in the background. The scene is dimly lit with blue light, suggesting a high-tech environment. The woman in the black dress is leaning forward, looking at the seated woman. The man in the background is looking towards the seated woman. The overall atmosphere is one of scientific inquiry and genetic manipulation.

“The GenRich—who account for ten percent of the American population— [will] all carry synthetic genes. All aspects of the economy, the media, the entertainment industry, and the knowledge industry are controlled by members of the GenRich class...

“Naturals [unaltered humans] work as low-paid service providers or as laborers. [Eventually] the GenRich class and the Natural class will become entirely separate species with no ability to crossbreed, and with as much romantic interest in each other as a current human would have for a chimpanzee.

<http://www.dcclothesline.com/2016/06/16/depopulation-invisible-microparticles-in-food-can-deliver-vaccines-drugs/>

US Patent application 'US20080044481 A1'. "Microparticles for oral delivery."

May 27, 2005. The inventor and assignee is listed as Mordechai Harel, who was associated with Advanced BioNutrition Corporation of Columbia, Maryland. Here are a group of quotes from the patent application. The statements leave no doubt about the wide, wide application of the technology.

A dark, atmospheric photograph of a cemetery. The scene is shrouded in a thick, grey fog, creating a somber and mysterious mood. In the foreground, several tombstones are visible, some of which are tilted or partially obscured by the fog. A prominent, tall, dark monument stands on the left side of the frame. In the background, more tombstones and trees are visible, their forms softened by the mist. The overall lighting is very low, with the primary light source being the fog itself, which diffuses the light and creates a hazy, ethereal glow. The colors are muted, dominated by greys, blacks, and dark greens.

“The particles described herein can be used to deliver bioactive agents (e.g., nutrients, drugs, vaccines, antibodies, and the like), bacteria (e.g., probiotic bacteria), smaller particles, or substantially any other material to the animal.”

“The particles described herein can be prepared and used as free-flowing dry powders, slurries, suspensions, and the like, and are useful for delivering to an animal a drug, a pesticide, a nutrient, a vaccine, a smaller particle, or substantially any other composition that can be contained in the particles. The particles are thus suitable for use in human food products, animal feeds (e.g., pet foods and farmed animal diets), therapeutic compositions (e.g., drugs), prophylactic compositions (e.g., vaccines, antibiotics, and probiotic bacterial preparations), and pest control products among other products.”

IN AFFECTIONATE REMEMBRANCE OF
THOMAS BAGHALL COLLIER,
SOLICITOR, LIVERPOOL,
WHO DIED AT CLUGHTON,
THE 21ST OF OCTOBER 1872,
AGED 68 YEARS.
ALSO EMMA CHARLOTTE COLLIER,
WIDOW OF THE ABOVE,
WHO DIED IN LONDON,
1880.

“A ‘particle’ is a discrete piece of a (homogeneous or heterogeneous) material having a maximum dimension not greater than 5000 micrometers.”

“Furthermore, when the microparticles are to be used as components of a food product, it can be desirable that the microparticles are not visible.”

“Examples of these [deliverable micro] agents include antibiotics, analgesics, vaccines, anti-inflammatory agents, antidepressants, anti-viral agents, anti-tumor agents, enzyme inhibitors, formulations containing zidovudine, proteins or peptides (such as vaccines, antibodies, antimicrobial peptides), enzymes, (e.g., amylases, proteases, lipases, pectinases, cellulases, hemicellulases, pentosanases, xylanases, and phytases), liposomes, aromatic nitro and nitroso compounds and their metabolites, HIV protease inhibitors, viruses, and steroids, hormones or other growth stimulating agents, pesticides, herbicides, germicides, biocides, algicides, rodenticides, fungicides, insecticides, antioxidants, plant and animal growth promoters, plant and animal growth inhibitors, preservatives, nutraceuticals, disinfectants, sterilization agents, catalysts, chemical reactants, fermentation agents, foods, animal feeds, food or animal feed supplements, nutrients, flavors, colors, dyes, cosmetics, drugs, vitamins, sex sterilants, fertility inhibitors, fertility promoters, air purifiers, microorganism attenuators, nucleic acids (e.g., RNA, DNA, PNA, vectors, plasmids, ribozymes, aptamers, dendrimers, and the like), antioxidants, phytochemicals, hormones, vitamins (such as vitamins A, B1, B2, B6, B12; C, D, E, and K, pantothenate, and folic acid), pro-vitamins, carotenoids, minerals (such as calcium, selenium, magnesium salts, available iron, and iron salts), microorganisms (such as bacteria, such as probiotics, lactobacilli, fungi, and yeast), prebiotics, trace elements, essential and/or highly unsaturated fatty acids (such as omega-3 fatty acids, and mid-chain triglycerides), nutritional supplements, enzymes (such as amylases, proteases, lipases, pectinases, cellulases, hemicellulases, pentosanases, xylanases, and phytases), pigments, amino acids, agriculturally useful compositions to either prevent infestation (such as herbicides, pesticides, insecticides, rodenticides, fungicides, mixtures thereof) or to promote growth (such as hormones, fertilizers, or other growth stimulating agents), flavorants, and fragrances.”

<http://www.dcclothesline.com/2016/07/10/cdcs-vaers-data-confirm-multiple-vaccines-given-at-same-time-increase-morbidity-and-mortality-in-children/>

Kudos to medical research journalist Neil Z Miller on the publication of an apparent retrospective analysis of CDC VAERS data titled “Combining Childhood Vaccines at One Visit Is Not Safe” published in the *Journal of American Physicians Surgeons* Volume 21, Number 2, Summer 2016.

According to Miller, “*Since 1990, the VAERS database has received more than 500,000 reports of suspected adverse reactions to vaccines.*” That’s over half a million and vaccines are considered safe?

Vaccine Doses and Hospitalizations

Of the 38,801 VAERS reports that we analyzed, 969 infants received two vaccine doses prior to the adverse event and 107 of those infants were hospitalized: a hospitalization rate of 11%. Of 1,959 infants who received three vaccine doses prior to the adverse event, 243 of them required hospitalization: 12.4%. For four doses, 561 of 3,909 infants were hospitalized: 14.4%. Notice the emerging pattern: Infants who had an adverse event reported to VAERS were more likely to require hospitalization when they received three vaccine doses instead of two, or four vaccine doses instead of three.

The pattern continues: Of 10,114 infants who received five vaccine doses prior to the adverse event, 1,463 of them required hospitalization: 14.5%. For six doses, 1,365 of 8,454 infants were hospitalized: 16.1%. For seven doses, 1,051 of 5,489 infants were hospitalized: 19.1%. And for eight doses, 661 of 2,817 infants were hospitalized: 23.5%. The hospitalization rate increased linearly from 11.0% for two doses to 23.5% for eight doses. Linear regression analysis of hospitalization rates as a function of the number of reported vaccine doses yielded a linear relationship, with an R² of 0.91.

Note: The hospitalization rate of infants who received just one vaccine dose was disproportionately high (16.3%) due to the hepatitis B vaccine administered at birth. As such, the hospitalization rate corresponding to one dose is an outlier and was excluded from the linear regression analysis.

Parents and pediatricians/obstetricians must take special note of the disproportionately high rate of hospitalization for infants who received the hepatitis B vaccine administered at birth: a whopping 16.3%!

The Hep B vaccine, more than any vaccine, is the most unnecessary of all vaccines since Hep B is contracted from sexual activity and sharing of drug paraphernalia, etc.—something a newborn can't be involved with for many years, I'd say. However, if the pregnant mother had Hep B, there *possibly* could be a reason for administering that vaccine to the newborn, but many even would question that.

<http://www.dcclothesline.com/2016/07/17/death-by-guns-vs-death-by-vaccines/>

There are 30,000 gun related deaths per year by firearms. That is not disputed.

What is never shown, though, is a breakdown of those deaths to put them in perspective, as compared to other causes of death. [CJF emphasis]

- 65% of those deaths are by suicide, which would never be prevented by gun laws
- 15% are by law enforcement in the line of duty and mostly justified
 - 17% are through criminal activity, gang and drug related or mentally ill persons
- 3% are accidental discharge deaths

So technically, “gun violence” is not 30,000 annually, but drops to 5,100 (0.17 x 30,000).

Still too many? Well, first, how are those deaths spanned across the nation?

- **480 homicides (9.4%) were in Chicago**
- **344 homicides (6.7%) were in Baltimore**
- **333 homicides (6.5%) were in Detroit**
- **119 homicides (2.3%) were in Washington DC (a 54% increase over prior years)**

So basically, 25% of all gun crime happens in just 4 cities. All 4 of those cities have strict gun laws, so it is not the lack of law that is the root cause.

A close-up photograph of a handgun's magazine, showing several rounds of ammunition. The magazine is black and the rounds are silver. The background is blurred, showing a person's hand holding the gun. The text is overlaid on the right side of the image.

So who are responsible for the majority of gun deaths?

Suicides claim 65 percent; law enforcement 15 percent; accidental gun discharges 3 percent. That leaves 17 percent of gun deaths from criminal type activity or mentally ill persons with four large cities accounting for most of those criminal deaths: Chicago 9.4 percent; Baltimore 6.7 percent; Detroit 6.5 percent; and Washington, D.C.. 2.3 percent. *Interesting?*

However, there are no classifications for “false flag event” [4] and terrorism deaths, which really should become specific forensic categories, I think.

Now, let's take a look at deaths from vaccines!

One type of death—gun—is targeted to be dealt with publicly, while the other—vaccine deaths—are totally disregarded and apparently considered 'normal collateral damage' necessary to protect 'herd immunity'.

According to Page 5 of the HRSA Vaccine Payout Schedule [1], we see that 1,197 deaths from vaccines have been reported since October 1, 1988 to July 1, 2016. Granted, it's not 30,000 per year but, if people are concerned about deaths perpetrated by others, shouldn't there be more concern about vaccinees' lives too?

Not only do vaccines cause deaths, they also cause horrendous adverse health effects that can last a lifetime [5]. Pages 8 and 9 of the HRSA Vaccine Payout Schedule [1] document the scope of vaccine health damages, which probably represents less than 5 to 10 percent of *what's reported by doctors*, according to former FDA Commissioner David Kessler, MD [3].

<https://jonrappoport.wordpress.com/2016/10/05/cdc-police-will-eventually-arrest-the-unvaccinated-as-diseased-criminals/>

Americans traveling between states can be stopped, detained, and even quarantined, if they seem to have indications of an illness that could impact public health.

If this sounds vague, it is. The CDC has even coined a new absurd category: “precommunicable” illness. It means that with few or no symptoms—but merely the probability of having contacted someone who had or could have had an illness—a traveler in America can be picked up and held against his will.

The CDC asserts it has police powers to do this. During the quarantine period, the person has no right to refuse medical treatment—which can include (toxic) vaccinations. After release, the person will be tracked electronically, and this surveillance can extend to an ankle bracelet.

The CDC and its state allies are expanding the promotion of mandatory vaccines. The state of California now has such a law (SB277) for all public and private school children. There is a move to extend the mandate to adults.

**So...suppose you are spotted and detained as a person who may have a precommunicable disease. One of the first questions you'll be asked is: "Are you up to date on your vaccinations?"
If not, you'll get them. Forcibly.**

California Vaccination Bill SB 277 Signed By Governor, Becomes Law

A California bill that removes all exemptions to vaccine requirements for school entry except those medically indicated has just become law. After the California Assembly passed SB 277 on Thursday and the state senate passed the same version Monday, Governor Jerry Brown signed the bill into law this morning.

“The science is clear that vaccines dramatically protect children against a number of infectious and dangerous diseases,” Brown wrote in his signing message. “While it’s true that no medical intervention is without risk, the evidence shows that immunization powerfully benefits and protects the community.”

The law applies to students attending any public or private school in the state, so parents who choose not to vaccinate children for non-medical reasons would need to homeschool their children. The only other states with similar immunization policies that do not allow any non-medical exemptions are Mississippi and West Virginia.

Nurse Whistleblower: Hospitals Vaccinating Patients by Force Without Their Knowledge

<https://vaccineimpact.com/2016/nurse-whistleblower-hospitals-vaccinating-patients-by-force-without-their-knowledge/>

Recently, another medical/health whistleblower made immediate waves by publicly recounting her continued experiences witnessing daily routine vaccine injury in U.S. hospital neonatal intensive care units (NICUs). **Nurse whistleblower Michelle Rowton told of a callous medical system that regularly and inhumanly chooses to give the CDC's recommended vaccine schedule to premature infants causing massive increases in severe and life threatening adverse reactions.** According to Rowton, the attending doctors and medical staff have made these routine, medically incompetent actions into jokes to be laughed at on the hospital floor and in break rooms.

A dark, stormy sea with a pier extending into the water under a lightning-filled sky. The scene is dimly lit, with the primary light source being the lightning bolts striking the water in the distance. The pier is made of metal and has a railing, leading from the foreground into the dark water. The sky is filled with heavy, dark clouds, and several bright lightning bolts are visible, illuminating the scene and creating a sense of danger and urgency.

Since the Affordable Care Act came out, we are now — as nurses — required to ask every single patient when they come to the hospital if you've had your flu vaccine or your pneumococcal vaccine. If you say no to either one of those, in the computer, an order will generate that says we need to give you this vaccine. We don't need to speak to a doctor...it's hospital policy. It's now health department policy that we now have to give you the vaccine.

New Signed Consent for Hospital Services Includes Vaccines – But Patients Unaware They are Granting Such Consent

When you go to the hospital if you need surgery — say you need a knee replacement surgery — first they're going to ask you if you've had your vaccines.

You're going to say no. Then they're going to say you need to sign this consent if you're going to have surgery...you need to sign a consent. In the consent, there's a word call 'biogenics [biologics]' and if you sign the consent saying 'I consent for you to give me biogenics [biologics]' — that basically means that they can give you anything that they deem necessary including vaccines. So if you say that you didn't get a flu shot and it's flu season and you sign the consent saying I agree to biogenics [biologics], they will give you a vaccine even when you're under anesthesia because you already signed the consent.

Published on Oct 11, 2013
This is on a China Eastern flight from Shanghai to Sydney. The hostesses sprayed this all through the cabins about 30 minutes before landing. I was told to stop filming.

https://www.youtube.com/watch?v=oAkM_Ps5-gM

We had no information, no announcement, no MSDS or anything telling us what and why.

FACTS:

1. It IS a pesticide - D-Phenothrin OR Permethrin

2. It happens during or just prior to descent on ALL inbound flights for Australia and New Zealand even if you don't see it. More residual sprays are used before passengers board, leaving a film on all surfaces.

3. It is not the decision of the Airline. It is decided by the government of the destination country. See <http://www.agriculture.gov.au/biosecur...>

No need to bash China Eastern. They just do it in a visible way. Other airlines do it through the ventilation systems. Don't believe it? Read the WHO/IPCS document.

4. W.H.O. and the I.P.C.S. have documented the reasons, procedures, risks and health impact. Read it yourself here: <http://www.who.int/ipcs/publications/...>

5. All passengers agree to this when they accept the terms and conditions of the ticket.

6. The hostesses/flight attendants are at the greatest toxic risk. Spare a thought for them.

The Latest in Atrocious Supreme Court Decisions - Only 2 Justices Stand Up for Your Rights...

On February 22, 2011 the U.S. Supreme Court shielded drug companies from all liability for harm caused by vaccines mandated by government when companies could have made a safer vaccine.

From now on, drug companies selling vaccines in America will not be held accountable by a jury of our peers in a court of law if those vaccines brain damage us but could have been made less toxic.

To understand how this happened, we have to turn the clock back to 1982. That is when four big drug companies (Merck, Wyeth, Lederle, Connaught) blackmailed Congress by threatening to stop selling vaccines in America unless a law was passed giving them complete immunity from prosecution.

Polio Vaccines – Weaponized Cancer

Compelling story on cover ups and Government fraud. 1963 – History of Polio vaccine corruption – drug companies pushed by Government to create a Polio vaccine, discovered vaccines were contaminated cancer viruses (SMV-40) and vaccinated 100 million children any way to meet the Government deadline. Big Pharma's rational was they would come up with a 'cancer' cure later. Polio vaccines = 15 cases of cancer for every 1 polio case.

Brilliant Judyth Vary Baker (who dreamed of finding a cure for cancer) was recruited into a covert bio-weapon lab in New Orleans to create vaccine to kill Fidel Castro. Judyth as a student was able to make cancer grow faster than the government labs. As a covert operative, she was assigned protection by government agent Lee Harvey Oswald.

Monkey's tortured, killed, crippled, prisoners on death row used for test subjects – Judyth left this insanity. Polio vaccines = 15 cases of cancer for every 1 polio case. Good for Pharma business, radiation enhances tumor growth for the 100 million children vaccinated in the 1960's now adults – Cancer epidemic we are seeing now. Airport X-Rays....This is why we have a soft tissue cancer epidemic now.

North Idaho – 3 Vaccine Deaths in 2 Months – Within 1 Week After Shots

Doctor states increased SIDS (Sudden Infant Death Syndrome) death after vaccines is a consequence! Just two days after vaccination, this Mother's child has died. Once again, all parties involved in the manufacturing, approving and administering of these deadly injections have refused to come forward and take responsibility for another senseless, tragic death.

<http://www.aircrap.org/2016/10/11/north-idaho-3-vaccine-deaths-2-months-within-1-week-shots/>

Hillary Clinton wants to force vaccinate your children, have them owned by the state

http://www.naturalnews.com/055675_Hillary_Clinton_forced_vaccination_statist.html

As far back as 1993, for instance – when Clinton was first lady and pushing for an earlier version of Obamacare (again under the guise of "health care reform") – two [programs she backed](#) were the Childhood Immunization Initiative and Vaccines for Children.

Now, it wouldn't be Hillary if her position hadn't changed over the years, largely due to the whims of donors of course. In 2008, for instance, during her first presidential campaign, she alluded to research that [established a link](#) between vaccines and higher rates of autism in children. "I am committed to make investments to find the causes of autism, *including environmental causes like vaccines* [my emphasis]... We don't know what, if any, kind of link there is between vaccines and autism – but we should find out," she said.

By February 2015, as she was ramping up her current presidential bid, she Twitter-trolled some Republican presidential candidates after the link between vaccines and autism came up during an early GOP debates, in which a few of the candidates - including Trump - voiced concern and expressed caution about the efficacy of vaccinating kids with a high number all at once. After the debate Clinton tweeted, "The science is clear: The earth is round, the sky is blue and #vaccineswork. Let's protect our kids."

She is the number one recipient of Big Pharma donations this election cycle, her opinion now appears solidly in the camp of the pharmaceutical industry, now that the industry is helping her campaign pay its bills. That will be another slap at the personal choice and health freedom of American parents. She could even push for a vaccine mandate, like the one recently passed in California.

<http://www.dcclothesline.com/2015/08/04/profit-over-safety-centers-for-disease-control-names-271-new-vaccinations/>

Today, biopharmaceutical research companies are developing 271 vaccines for infectious diseases, cancer, neurological disorders, allergies and other diseases.

The report listed the 271 vaccinations currently under development.

They included:

allergic asthma
peanut hypersensitivity
AIDS/HIV
influenza (for pandemic and seasonal)
breast cancer
pancreatic cancer
ovarian cancer
lung cancer
malaria
cervical cancer (HPV gene E7)
smoking cessation
Lyme disease
cholera

DynCorp Intl is a huge company with subsidiaries – one being DynPont Vaccines which was awarded a \$322 million contract on 11/12/2001 – to develop, produce, test and store FDA-licensed vaccines for use by the Defense Department.

DynCorp International is an American [private military contractor](#). Begun as an aviation company, the company also provides flight operations support, training and mentoring, international development, intelligence training and support, contingency operations, security, and operations and maintenance of land vehicles. DynCorp receives more than 96% of its more than \$3 billion in annual revenues from the U.S. federal government.

<http://www.markswatson.com/deadmicos.pdf>

DEATH TOLL MOUNTING AS CONNECTIONS TO DYNCORP, HADRON, PROMIS SOFTWARE AND DISEASE RESEARCH EMERGE

Feb. 28, 2002 -- In the four-month period from Nov. 12 through Feb. 11, seven world-class microbiologists in different parts of the world were reported dead. Six died of "unnatural" causes, while the cause of the seventh's death is questionable. Also on Nov. 12, DynCorp, a major government contractor for data processing, military operations and intelligence work, was awarded a \$322 million contract to develop, produce and store vaccines for the Department of Defense. **DynCorp and Hadron, both defense contractors connected to classified research programs on communicable diseases, have also been linked to a software program known as PROMIS, which may have helped identify and target the victims.**

<http://educate-yourself.org/cn/ottdyncorpunholytrinity21feb10.shtml>

Since its beginnings in 1946, DynCorp International today is, according to its own website, “a major government contractor for data processing, military operations and intelligence work.” DynCorp lists its primary “public sector clients” as: **The Center for Disease Control (CDC), Department of Defense (DoD), Bureau of Census, Department of Education, Department of Energy, Department of Health and Human Services, Federal Bureau of Investigation (FBI), U.S. Air Force (USAF), U.S. Army, U.S. Navy, and of all things, the U.S. Postal Service (USPS).**

The truth is, DynCorp International is much more than that. According to CorpWatch, and even Wikipedia, DynCorp International provides training for police forces worldwide. It is the primary “private security force” in Iraq and provides top security for the CIA’s extensive poppy fields in Afghanistan. It also provided the security for New Orleans following Hurricane Katrina. It is responsible for patrolling the entire U.S./Mexican Border, performs “essential services” in Colombia to known drug cartels, and of course – is deeply involved in the international “sex slave” trade so vividly portrayed in the recent movie “Taken” starring Liam Neeson. It would appear that DynCorp is just as sleazy as its predecessor, the Nazi Gestapo. Could this have anything to do with its most powerful directors being related to Gestapo officers?

DynCorp has dozens of U.S. and international patents relating to the process of MANUFACTURING VIRUSES from African green monkey kidney cells. US Patent 6025182 – “Method for producing a virus from an African green monkey kidney cell line” was issued to DynCorp Intl. on February 15, 2000 (9) This patent clearly describes the process of creating a “novel” virus from monkey cell material. Moreover, we find that the “inventors” of the patented process, also are “employed” by Ft. Detrick – where we know that the 1918 killer flu virus was replicated and weaponized using monkey cell material as the construction material.

The pandemic influenza vaccine needles deliver dozens of small, nano-sized computer chips into the blood of each individual being vaccinated. **These “nano-chips” are designed to pass the human blood-brain barrier and eventually lodge in the brain’s neurons.** After reaching their intended final destination in the human brain neurons, these incredible nano-chips then are designed to communicate via satellite with a covert master computer, and the unsuspecting victim becomes an unwilling spy tool. The victim’s eyes become the NSA’s remote camera, and their ears become their listening device. This of course, is very ingenious, to say the least – but very, very dangerous to human freedom and privacy. The new RFID chips have a whopping 128-bit ROM capacity (as much as many laptop computers) for storing a unique 38 digit number, which is then placed into the master computer’s data base along with the chip’s reading of the victim’s unique DNA structure. *Every human thought, reaction, hearing, and visual observation causes a certain neurological potential, spikes, and patterns in the brain and its electromagnetic fields, which can now be decoded into thoughts, pictures, and voices at the master computer.* **Electromagnetic stimulation via implanted microchips can therefore change a person’s brainwaves and affect muscular activity, causing painful muscular cramps experienced as torture, or on the other extreme, can stimulate the brain with euphoria and feelings of extreme peace when the individual follows the master computer’s instruction.**

The NSA's electronic surveillance system housed underground at Fort Meade, can today simultaneously follow and handle millions of people. Each of us has a unique bioelectrical resonance frequency in the brain, just as each human has unique fingerprints. With electromagnetic frequency (EMF) brain stimulation fully coded by these 128-bit ROM nano-chips, specific pulsating electromagnetic signals can be sent to the brain, causing the desired voice and visual effects to be experienced by the target. In addition to having the eyes and ears of the victim sending signals to the master mainframe computer, the computer can also manipulate the very thoughts and physical behavior of the victim as well! This is a very real form of electronic warfare. U.S. astronauts were implanted before they were sent into space so their thoughts could be followed and all their emotions could be registered 24 hours a day by NASA computers in Houston.

Nano-chips removed from a “powder” reported to be coating the inside of “H1N1” vaccine in comparison to a human hair.

Nanotechnology deals with structures smaller than one micrometer (less than 1/30th the width of a human hair), and involves developing materials or devices within that size. To put the size of a nanometer in perspective, it is 100,000 times smaller than the width of a human hair.

Japan's Hitachi says it has developed the world's smallest and thinnest microchip, that can be embedded in paper to track down parcels or prove the authenticity of a document. The integrated circuit (IC) chip is as minute as a speck of dust.

Doug Dorst, a microbiologist and vaccine critic in South Wales, says these advances have an immense appeal to vaccine makers. "Biotech companies and their researchers have quickly moved most funding initiatives towards nanotechnology to increase the potency of their vaccines," he said.

Dorst claims that present day nanobot technology could just as easily be used to advance biological weapons as they can to advance human health. "For every fear that biotech propaganda proliferates about deadly diseases and how vaccines prevent them, it is one more lie to incrementally convince the masses that vaccines are effective."

The worry for Dorst is that one day vaccines "will do what they've always been intended for...control of the global populace."

The timeline for integrating nano-microchips inside of vaccines is speculative. It could be just a few years, months or perhaps it is here and we unaware of their integration within pharmaceuticals. Regardless, due to the many military and political advantages, their implementation is inevitable.

However fraudulent, it was an imperative for world powers and pharmaceutical cartels to promote the effectiveness of vaccinations and enact national pandemic preparedness policies which mandate vaccinations.

In 2005 the World Health Organization (WHO) developed international health regulations that would bind all 194 member countries to pandemic emergency guidelines which could enforce such a mandate. Without these procedures of public health (and propagandized vaccine campaigns) in place, there would be little or no voluntary cooperation from the public to roll up their sleeves and accept the inoculations. Public participation is an essential tool that will soon allow big pharma to inject the most effective surveillance tool ever designed into billions of people.

http://www.naturalnews.com/026779_vaccine_flu_virus.html

If people knew what was really in those vaccines, they would never allow themselves to be injected with them.

Aside from the dangerous ingredients many people already know about (like squalene or thimerosal), one of the key ingredients used in flu vaccines (including the vaccines being prepared for the swine flu pandemic) is the diseased flesh of African Green Monkeys. This is revealed in U.S. patent No. 5911998 - *Method of producing a virus vaccine from an African green monkey kidney cell line.*

DynCorp, it turns out, is a one of the top private military contractors working for the U.S. government. In addition to allegedly trafficking in under-age sex slaves in Bosnia and poisoning rural farmers in Ecuador with its aerial spraying of Colombian coca crops, Dyncorp just happens to be paid big dollars by the U.S. government to patrol the U.S. / Mexico border, near where the H1N1 first swine flu virus was originally detected.

DynCorp also happens to be in a position to receive tremendous financial rewards from its patents covering attenuated live viral vaccine harvesting methods, as described in four key patents jointly held by DynCorp and the National Institutes of Health:

(6025182) Method for producing a virus from an African green monkey kidney cell line

(6117667) Method for producing an adapted virus population from an African green monkey kidney cell line (<http://www.patentstorm.us/patents/6117667/de>)

(5911998) Method of producing a virus vaccine from an African green monkey kidney cell line

(5646033) African green monkey kidney cell lines useful for maintaining viruses and for preparation of viral vaccines

So far, we have the U.S. government awarding swine flu vaccine manufacturing contracts to a major U.S. vaccine manufacturer (Baxter) that uses vaccine ingredients from African Green Monkeys (sick!), derived from a process covered in a patent invented by U.S. government NIH researchers (Dr. Purcell and others) and now held jointly by the NIH and a private military contractor named DynCorp -- the very same company that's paid to monitor the U.S. / Mexico border where H1N1 swine flu first appeared.

In September 2001, a group of Ecuadorian farmers filed a class-action lawsuit against DynCorp under the Alien Tort Claims Act (ATCA), the Torture Victim Protection Act and state law claims in US federal court in the District of Columbia. The plaintiffs claimed that from January to February 2001 DynCorp sprayed the herbicide almost daily, in a reckless manner, causing severe health problems (high fever, vomiting, diarrhea, dermatological problems) and the destruction of food crops and livestock of approximately 10,000 residents of the border region. In addition, the plaintiffs alleged that the toxicity of the fumigant caused the deaths of four infants in this region. The plaintiffs alleged under ATCA that DynCorp's intensive aerial spraying of a toxic fumigant amounted to torture, a crime against humanity and cultural genocide.

<http://www.theblackvault.com/documentarchive/nsa-surveillance-program-promis/#>

PROMIS is believed by some to be the forefather to the now infamous “Prism” program by the National Security Agency (NSA). The “Prism” program was brought to light by leaker Edward Snowden, yet it is now coming to light, that a program has existed long before this new revelation. It was known as PROMIS.

PROMIS was designed in the late 1970s and '80s to bring Department of Justice criminal case management from the dark ages into the light of the computer age. In the spring of 1981, the Reagan Administration hailed PROMIS as one of law enforcements greatest assets. By 1983, PROMIS had morphed into the behemoth of intelligence gathering. It was not state of the art – it was the art. Over the ensuing decades PROMIS is reported to have been used by the DOJ, CIA, NSA, and several foreign intelligence agencies including Israel's Mossad. The ownership of PROMIS has been the subject of federal court hearings and a congressional investigation.

<http://futurism.com/genetics-of-autism-scientists-find-new-link/>

Scientists have isolated another gene — neurofibromatosis type 1 (NF1) — linked to autism symptoms in nearly half of 100,000 people suffering from the rare NF1 tumor disorder.

The research provides hope in finding new genetic links and treatments for the neurological disorder that affects millions of Americans and 1 in 68 children

NF1 is caused by mutations in a single gene — NF1,” Morris said, according to WUSTL news. “Our research indicates that this single gene also is associated with autism spectrum disorders in these same patients

What are the ODDS that they would find a single GENE linking back to Autism? It's been proven that VACCINES cause Autism, and yet they have been working hard to disprove that, making it a conspiracy theory!!!

There are 24,000 Genes in the human body, what is a Gene?

Genes are really just the instructions for making a protein. Each protein does a different job in the cell.

A gene mutation is a change that occurs in our DNA sequence, either due to mistakes when the DNA is copied or as the result of environmental factors such as UV light and cigarette smoke.

Yahuah made an amazing machine, man tries to change it - the body remakes itself in it's entirety every 7 years - many of your organs will do that in days, such as your stomach. So if something has happened within your body to change a cell then your body will make that cell as it has become. With that in mind and knowing what it is that vaccines are really meant to do such as mutating your cells, then it becomes easy to pass that on to your children.

Chemicals in everyday products linked to cancer, autism, diabetes
http://www.nzherald.co.nz/lifestyle/news/article.cfm?c_id=6&objectid=11731706

Neurological damage and behavioral problems, including attention-deficit/hyperactivity disorder (ADHD), autism and loss of IQ, accounted for at least four-fifths of these impacts, researchers said in *The Lancet Diabetes & Endocrinology*, a medical journal.

And yet - previously, we are seeing that autism is now according to them, to be inherited or genetic!!!!

The invisible but dangerous chemicals also boosted obesity, diabetes, some cancers, male infertility and a painful condition known as endometriosis, the abnormal growth of tissue outside the uterus.

The body's endocrine tissues produce essential hormones that help regulate energy levels, reproduction, growth, development, as well as our response to stress and injury.

Bisphenol A, used to line tin food cans, along with phthalates in plastic food containers and many cosmetics, were also held to be responsible for upward of \$50 billion (NZ\$69 billion) worth of health damages.

CDC Vaccine Science Covers Up Giant Conflict of Interest

<http://www.infowars.com/cdc-vaccine-science-covers-up-giant-conflict-of-interest/>

The government's Vaccine for Children Program (a CDC organization) purchases vaccines for about 50 percent of children in the U.S." (The Atlantic, February 10, 2015)

"The CDC currently spends over \$4 billion purchasing vaccines [annually] from drug makers..." (Health Impact News, October 24, 2016)

When, in 2014, William Thompson, a long-time CDC researcher, publicly admitted he and his colleagues had buried data that would have shown the MMR vaccine increases the risk of autism, he was throwing a stick of dynamite into the whole CDC operation. He was also saying, in recorded phone conversations, that the CDC was lying about vaccine safety in other studies.

Thompson was threatening a \$ 4-billion-a-year enterprise.

What's New for the 2016-2017 Flu Season?

New for the 2016-2017 flu season:

- Only injectable flu shots are recommended this season.
- Flu vaccines have been updated to better match circulating viruses.
- There will be some new vaccines on the market this season.
- The recommendations for vaccination of people with egg allergies have changed.

What flu vaccines are recommended this season?

This season, only injectable flu vaccines (flu shots) should be used.

Options this season include:

- Standard dose flu shots. Most are given into the muscle (usually with a needle, but one can be given to some people with a jet injector). One is given into the skin.
- A high-dose shot for older people.
- A shot made with adjuvant for older people.
- A shot made with virus grown.

... vaccine production technology ... (LAIV) - or the ... cause

... does not ... ended for

ing the 201 , season concern

What flu vaccines are new this season?

This season, a flu vaccine with adjuvant will be available for the first time in the United States. Adjuvant is a vaccine ingredient that helps create a stronger immune response in the patient's body. This new vaccine ("FLUAD™") is approved for use in people 65 years and older.

This season, a flu shot that protects against four flu viruses made with virus grown in cell culture will be available for the first time in the U.S ("FLUCELVAX™"). (Last season, FLUCELVAX™ protected against three flu viruses.) FLUCELVAX™ is approved for use in people 4 years and older.

8. USE IN SPECIFIC POPULATIONS

8.1. Pregnancy

Pregnancy Category B: A reproductive and developmental toxicity study has been performed in rabbits with a dose level that was approximately 15 times the human dose based on body weight. The study revealed no evidence of impaired female fertility or harm to the fetus due to FLUAD. There are, however, no adequate and well-controlled studies in pregnant women. Because animal reproduction studies are not always predictive of human response, this vaccine should be used during pregnancy only if clearly needed.

In a reproductive and developmental toxicity study, the effect of FLUAD on embryo-fetal and post-natal development was evaluated prior to gestation, during the period of organogenesis (gestation by intramuscular injection twice prior to gestation, during the period of organogenesis (gestation day 7) and later in pregnancy (gestation day 20), 0.5 mL (45 mcg)/rabbit/occasion approximately 15-fold excess relative to the adult human dose based on body weight). No effects on mating, female fertility, pregnancy, embryo-fetal development, or post-natal development were observed. There were no vaccine-related fetal malformations or other adverse effects observed in the pediatric population have not been established. Limited in adults 65 years of age and older.

8.4. The safety and effectiveness of FLUAD have been evaluated in clinical studies. The safety and effectiveness of FLUAD have been evaluated in clinical studies. The safety and effectiveness of FLUAD have been evaluated in clinical studies.

8.5. Geriatric Use

Safety and immunogenicity of FLUAD have been evaluated in clinical studies. [See Adverse Reactions (6.1) and Clinical Studies (14)]

11. DESCRIPTION

FLUAD (Influenza Vaccine, Adjuvanted), a sterile suspension for intramuscular injection, is a trivalent, inactivated influenza vaccine prepared from virus propagated in the allantoic cavity of embryonated hens' eggs inoculated with a specific type of influenza virus suspension.

Each 0.5 mL dose contains at least 15 mcg of hemagglutinin (HA) from each of the following three influenza strains recommended for the 2016/2017 influenza season: A/California/7/2009, NYMC X-181 (H1N1) (an A/California/7/2009 pdm09-like virus); A/Hong Kong/4801/2014, NYMC X-263B (H3N2) (an A/Hong Kong/4801/2014-like virus); and B/Brisbane/60/2008, wild type (a B/Brisbane/60/2008-like virus). FLUAD also contains MF59C.1 adjuvant (MF59[®]), a squalene based emulsion. Each of the strains is harvested and clarified separately by centrifugation. The surface antigens, hemagglutinin and neuraminidase, are inactivated with formaldehyde. The inactivated virus is further purified by centrifugation. The antigen preparation is further purified by centrifugation. The antigen preparation is further purified by centrifugation.

11. FLUAD (Influenza Vaccine) is a trivalent, inactivated influenza vaccine containing 15 mcg of each of the three influenza strains recommended for the 2016/2017 season: NYMC X-181 (H1N1) (an A/California/7/2009 pdm09-like virus), NYMC X-263B (H3N2) (an A/Hong Kong/4801/2014-like virus), and a type (a B/Brisbane/60/2008-like virus). FLUAD also contains MF59C.1 adjuvant, a squalene based oil-in-water emulsion. Each of the strains is harvested and clarified by centrifugation and filtration prior to inactivation with formaldehyde. The inactivated virus is concentrated and purified by zonal centrifugation. The surface antigens, hemagglutinin and neuraminidase, are obtained from the influenza virus particle by further centrifugation in the presence of cetyltrimethylammonium bromide (CTAB). The antigen preparation is further

FLUAD is prepared by combining the three virus antigens with the MF59C.1 adjuvant. After combining, FLUAD is a sterile, milky-white suspension supplied in 0.5 mL single-dose pre-filled syringe. Each 0.5 mL dose contains 15 mcg of hemagglutinin (HA) from each of the three recommended influenza strains and MF59C.1 adjuvant (9.75 mg squalene, 1.175 mg of polysorbate 80, 1.175 mg of sorbitan trioleate, 0.66 mg of sodium citrate dihydrate and 0.04 mg of citric acid monohydrate) at pH 6.9-7.7.

FLUAD may contain trace amounts of neomycin (≤ 0.02 mcg by calculation), kanamycin (≤ 0.03 mcg by calculation) and barium (< 0.5 mcg by calculation), which are used during the initial stages of manufacture, as well as residual egg proteins (< 0.4 mcg), formaldehyde (≤ 10 mcg), or CTAB (≤ 12 mcg).

(NaturalNews) Compulsory vaccination has long been a requirement to serve in U.S. armed forces, and it is well documented that many of the vaccines administered to servicemen over the years have been experimental in nature, meaning they contained untested adjuvants and other questionable additives. But it has recently come to our attention that the highly toxic vaccine adjuvant squalene MF59, which was first given to servicemen back during the first Gulf War and later linked to causing Gulf War syndrome, is now being added to some civilian flu vaccines.

At a 2010 gathering of the American Rally for Personal Rights in Chicago, registered nurse and retired Air Force Captain Richard Rovet warned his listening audience about the dangers of squalene MF59, the devastation and horrors of which he witnessed first hand during his time in the service. The experimental oil-in-water adjuvant, which was forced on all servicemen beginning in 1999 via the mandatory anthrax vaccine, caused many of Capt. Rovet's comrades to suffer severe and permanent side effects. One of Capt. Rovet's close friends, in fact, was actually killed as a result of squalene MF59.

"For the past 60 years, the U.S. Military and other agencies within our government have used thousands of women as test subjects, oftentimes in secret and without their knowledge." In December of 1994, a report from the U.S. Department of Defense ... [that] outlines the unethical use of experimental, Capt. Rovet went on to say, "The documented evidence is directly

If you're ready for a zombie apocalypse, then you're ready for any emergency

emergency.cdc.gov

<http://news.wabe.org/post/atlanta-cdc-employees-express-anxiety-over-trumps-win>

The employees of one of the largest federal agencies in Atlanta said they're concerned about job safety, funding and new public health policies under Donald Trump's presidency. (I'm concerned that these are the people in charge of diseases!!!)

**GET A KIT
MAKE A PLAN
BE PREPARED**

EMERGENCY.CDC.GOV

At the General Muir deli across the street from the CDC, a few employees talked to WABE, asking that their names not be used. One microbiologist said her colleagues were crying in the hallways.

"It's really sad," she said. "It's depressing. I'm eating a bagel to try and be happy." (It's really depressing that we fund this kind of stuff!!)

She said she's worried Trump might appoint public health leaders who may not be in total support of mandatory vaccinations, pointing to Dr. Ben Carson or Florida Governor Rick Scott. (I can't wait...talk about curing autism!!!)

FOR IMMEDIATE RELEASE—AUGUST 27, 2014

STATEMENT OF WILLIAM W. THOMPSON, Ph.D., REGARDING THE 2004 ARTICLE
EXAMINING THE POSSIBILITY OF A RELATIONSHIP BETWEEN MMR VACCINE AND AUTISM

My name is William W. Thompson, Ph.D., Senior Scientist with the Centers for Disease Control and Prevention, where I have worked since 1991. I regret that my co-authors and I omitted statistically significant information in our 2004 article published in the journal *Pediatrics*. The omitted data suggested that African American males who receive MMR have a higher risk for autism. I made a statement regarding which firm reported the data, but the final study protocol was not followed.

I want to be absolutely clear that I believe vaccines have saved and continue to save countless lives. I would never suggest that any parent avoid vaccinating children of any race. Vaccines prevent serious diseases, and the risks associated with their administration are vastly outweighed by their individual and societal benefits.

NaturalNews.com

Another CDC worker said her job collecting data is partially funded through the Affordable Care Act. (Really, in addition to all the other money they get, they get money from the Affordable Care Act...bring it down!!!)

"I'm pretty worried about work that I've put in for the last year and a half if it gets repealed wholesale, and if that goes away, we regress like scientifically 20 years back," she said. (What, you've only been there for a year and a half, and you think what you do will put this back 20 years...wow!!!)

President-Elect Trump has promised to abolish the Affordable Care Act.

Psalm 112:7-8

He is not in fear of, intimidated or frightened of bad news, distress, calamity or misfortune; his heart is steadfast, established and secure in Yahuah. His heart is sustained and supported; he will not be afraid or intimidated, until he perceives and makes judgements on his adversaries.

Ps 69:27-28 Add and hand down guilt and punishment on top of their guilt and sin, and do not let them be acquitted or vindicated. Let them be blotted, erased and destroyed out of the book/scroll of the living, and let them not be recorded/written with the righteous, upright and innocent.

**NEXT UP: HIDDEN – THE SHADOW
